The third edition of Loftus ' Financial Reporting has been updated for recent developments in the Australian Accounting Standards, including the release of the new Conceptual Framework. This text is designed to be used across the 2nd and 3rd year financial accounting units. A hallmark feature of the text is that it provides both a conceptual understanding and a practical application of the accounting standards. For students, an understanding of the conceptual basis of accounting and the rationale behind the principles is crucial to the consistent application of standards in a variety of practical contexts. The Financial Reporting interactive e-text features a range of instructional media content designed to provide students with an engaging learning experience. This includes practitioner videos (from Ernst & Young), interactive worked problems and questions with immediate feedback. Loftus ' unique resource can also form the basis of a blended learning solution for lecturers.

All of the field ' s must-have information is delivered in an easy-to-grasp, visually clear and precise design.

The approach used by Hoyle, Schaefer, and Douppnik in the new edition allows students to think critically about accounting, just as they will do while preparing for the CPA exam and in their future careers. With this text, students gain a well-balanced appreciation of the Accounting profession. As Hoyle 12e introduces them to the field's many aspects, it often focuses on past controversies and present resolutions. The text continues to show the development of financial reporting as a product of intense and considered debate that continues today and into the future. The writing style of the eleven previous editions has been highly praised. Students easily comprehend chapter concepts because of the conversational tone used throughout the book. The authors have made every effort to ensure that the writing style remains engaging, lively, and consistent which has made this text the market leading text in the Advanced Accounting market. The 12th edition includes an increased integration of IFRS as well as updated accounting standards.

Practical skills. Relevant theory. Purposeful application. Kinicki/Williams 8e, *Management: A Practical Introduction* empowers students to develop the management skills necessary in everyday life through the practical and relevant application of theory. Developed to help students read and learn management with a purpose, this new edition engage students through current examples, imaginative writing and resources that work. The eighth edition of *Management: A Practical Introduction*--a concepts book for the introductory course in management--uses a wealth of instructor feedback to identify which features from prior editions worked best and which should be improved and expanded. By blending Angelo Kinicki's scholarship, teaching, and management-consulting experience with Brian Williams' writing and publishing background, we have again created a research-based yet highly readable, practical, and motivational text.

International Marketing addresses global issues and describes concepts relevant to all international marketers, regardless of their international involvement. Notwithstanding the extent of global perspective that firms may have, they are affected by the competitive activity in the global marketplace. It is this perspective that the authors bring into this edition of the text. The text focuses on the strategic implications of competition in different markets. The environmental and cultural approach to international marketing permits a truly global orientation. Thus the reader's horizon is not limited to any specific nation but the text provides an approach and framework for identifying and analyzing the important cultural and environmental uniqueness of any nation or global region. Salient Features: 10 Indian cases included in the book New sections on negative impact of new communication tools, intellectual property rights in the international context, Brexit, inventive international negotiation etc. Thoroughly updated data, text, pictures and exhibits across the chapters More than 100 new academic articles and their findings integrated and cited across the chapters

Loftus, Financial Reporting builds on the strengths of *Loftus, Understanding Australian Accounting Standards* and *Leo, Company Accounting*, bringing the strongest elements of those two respected titles into one combined volume. This 35 chapter text is designed to cover all of the 2nd and 3rd year financial accounting topics typically taught across two units, including accounting regulation, the conceptual framework, applying accounting standards, disclosures and group accounting. It explains accounting principles and practice to students in a clear, understandable way and provides both a conceptual insight as well as a practical application of the various accounting standards. The author team is comprised of a group of academics who are actively teaching in this area incl. Janice Loftus (Uni of Adelaide), Noel Boys (Melb), Belinda Luke (QUT), Sorin Daniliuc (ANU), Hong Ang (Deakin) and Karen Byrnes (USQ). The authors have brought their collective teaching insights to bear on the learning design of the text and accompanying online course the result of which is a contemporary teaching and learning package that will engage and empower students to study independently and achieve greater success in these challenging units.
