The online scamming industry is worth billions of dollars every year. Not looking to do any particular internet vigilante justice, Stephen Koral realised it was awash with scammers often desperate for money. Armed with a fake Facebook profile account, Koral enters the infamous realms of the 419 Nigerian scammers and makes them do stupid things for his own amusement, acting harder than he normally would, being protected by his keyboard. The book contains the conversations and interactions with these scammers. From the author of "Out of Hand in a Foreign Land" the book that sold upwards of twenty copies. Warning: Adult humour and content.

"This dynamic text applies physics concepts and equations to practical, real-world applications of semiconductor device theory"--

Babb (English, Georgetown U.) discusses theories of racial formation, the depiction of white identity in American literature, an instance in Moby Dick where white identity is deconstructed, and early 20th century immigrant autobiography as a guide to exploring some of the cultural agents--world's fairs, settlement houses, public schooling, and etiquette books--that codified representations of an ideal white identity. The nearly 150-year-old sport of cycling had its first competition in France in 1868. Soon afterward, the need arose for purpose-built cycling tracks because of poor road conditions at the time. Racing on blocked off pieces of street or grass soon evolved into racing on special tracks called velodromes. This development marked the split into what are still the two main forms of cycling competition: road racing and track racing. Initially, track cycling was more popular in terms of public attention and money to be earned by racers, but this gradually changed in favor of road racing, which has been the most popular form of cycling since at least the end of World War II. The Historical Dictionary of Cycling takes a closer look at the sport, as well as discussing the use of bicycles as a means of fitness, touring, and commuting. This is done through a chronology, an introductory essay, appendixes, photos, a bibliography, and over 500 cross-referenced dictionary entries on cycling's two main disciplines—road and track—as well as brief overviews of the other forms of cycling. This book is an excellent access point for students, researchers, and anyone wanting to know more about cycling.

The beloved American Lama, a spiritual leader whose inimitable light and lively universal teaching style has awakened the spirituality of thousands, now shares an enlightened approach to change and loss, dealing with difficult emotions such as fear, grief, and anger, and the role of crisis in uncovering our authentic selves. For many people, recent years have been characterized by profound change, whether it relates to financial upheaval, political shifts, or even massive losses of life to disease and violence. Even on the personal level each person

must confront the curves life throws his or her way. Buddhism has a great deal to say about change and impermanence and how to meaningfully deal with it. Change--whether on a large or small scale--provides our most important opportunity for learning about ourselves and the nature of reality. From this essential insight Lama Surya Das has crafted a fulfilling and important path to understanding and healing ourselves and finding peace. Full of personal stories, anecdotes, practical exercises, guided meditations and reflections, and pithy original aphorisms, *Letting Go of the Person You Used to Be* addresses life's most universal difficulties in a way that is accessible to all. By using memorable concepts such as *The Virtues of Adversity*, *The Pearl Principle* ("No inner irritation, no pearl"), and *Gaining through Loss*, Surya reminds readers that hiding from change and loss is futile. Learning to consciously accept and embrace change leads to a better understanding of ourselves and our own innate divine light.

The moving story of a woman learning to let go of the past in order to move forward with her own future, from the author of *Fierce Kingdom*. When Ren was twelve years old, she lost her older brother to a car accident. For twenty-five years he's been a presence in her life, appearing with a song or a reflection in the moonlight. Her connection to the ghosts around her has made her especially sensitive as an archaeologist, understanding the bare outline of our ancestors, recreating lives and stories, and breathing life into those who occupied this world long before us. On the cusp of the most important find of her career, it is the ghosts who are guiding her way. But what they have to tell Ren about herself, and her developing relationship with the first man to really know her since her brother's death, is unexpected—a discovery about the relationship between the past and the future, and the importance of living in the moment.

This valuable handbook covers all facets of the legal environment of long-term care administration in a clear, non-technical fashion.
