New York Times bestselling author Rachel Gibson returns with this dazzling love story filled with sizzle, sass, and just a bit of southern charm . . . "Hello, Ms. Vivian . . . it's been a long time." And with those words, Vivian Leigh Rochet nearly melted. It's been years since she last saw Harrison Whitley-Shuler. She was a teenager scrubbing houses for a living. He was

the gorgeous son of rich parents, not fit for the likes of her. Vivian had vowed to get out of Charleston, become a big Hollywood star, and stick it to the snooty girls who made her cry. She got what she wanted—and more—but why does her glamorous life seem so trivial? Harrison got out too . . . making it all the way to Wall Street, until a heart attack forced him to trade in his cufflinks for a good set of hand tools. Making furniture soothes his soul, but escaping the Whitley-Shuler heritage is nearly impossible. And now he's come face-to-face with the one who got away. He's

not looking for love. He's not even looking for sex . . . so why is resisting her the hardest thing he's ever done?

The fresh, astonishing follow-up to the acclaimed Low Town, again combining steely hardboiled crime with dark fantasy Once he was a hero of the Great War, and then a member of the dreaded Black House. Now he is the criminal linchpin of Low Town. His name is Warden. He thought he had left the war behind him, but a summons from up above brings the past sharply, uncomfortably, back into focus. General Montgomery's daughter is

missing somewhere in Low Town, searching for clues about her brother's murder. The General wants her found, before the stinking streets can lay claim to her, too. Dark, violent, and shot through with corruption, this book is a fantastic successor to a much-heralded fantasy debut.

This volume focuses on the responsibilities of online service providers (OSPs) in contemporary societies. It examines the complexity and global dimensions of the rapidly evolving and serious challenges posed by the exponential development of Internet services and

resources. It looks at the major actors – such as Facebook, Google, Twitter, and Yahoo! – and their significant influence on the informational environment and users' interactions within it, as well as the responsibilities and liabilities such influence entails. It discusses the position of OSPs as information gatekeepers and how they have gone from offering connecting and information-sharing services to paying members to providing open, free infrastructure and applications that facilitate digital expression and the communication of

information. The book seeks consensus on the principles that should shape OSPs' responsibilities and practices, taking into account business ethics and policies. Finally, it discusses the rights of users and international regulations that are in place or currently lacking.

This illuminating new book presents a series of in-depth case studies from around the world based on numerous personal interviews with organizational leaders and focusing on their journey towards sustainability. The aim is to provide visions of a more

sustainable future, and shed light on the path, milestones and solutions – in particular the management processes these organizations employed – to provide a reliable compass that others can follow. Although each organization must take steps to fit its particular circumstance, business conditions and culture, Mapping the Journey proves that valuable lessons can be learned by setting aside critique as to where these organizations may yet make progress and instead focusing on the guidelines, targets, measures of success, tools and techniques and valuable

wisdom about how pioneer organisations are travelling toward a prosperous, sustainable future. Each organization included has crafted its own unique strategic responses to an identified need for increased sustainability. While none can be said to have reached the end-point of a sustainable development strategy, all have found that, by addressing the challenge of sustainable industrial practices, they have found innovative solutions, new opportunities for revenue generation, better relationships with customers, new business and product opportunities and a

boost to morale from the executive ranks to front-line employees. Mapping the Journey examines both public and private organizations worldwide: SJ Rail of Sweden; Sony Corporation; SC Johnson; TransAlta Corporation; Patagonia; Henkel; Volvo; ASG; Interface Flooring Systems; Suncor; DaimlerChrysler; AssiDoman; Germany's Centre for Technology Assessment and the Dutch National Environmental Policy Plan. These case studies provide an inspiring framework of effective processes for defining a sustainable development strategy and transforming it successfully
