A high school text providing an introduction to the language and culture of the Spanish-speaking world.

While many professional translators believe the ability to translate is a gift that one either has or does not have, Allison Beeby Lonsdale questions this view. In her innovative book, she demonstrates how teachers can guide their students by showing them how insights from communication theory, discourse analysis, pragmatics, and semiotics illuminate the translation process. Challenging long-held assumptions, she establishes a fascinating framework on which to base the structure of a professional prose-translation class. Her original contributions to the question of directionality and to the specific strategies of translating are applicable to not only the teaching of translation from Spanish to English, but to other teaching situations and to other pairs of languages as well. She also reviews the latest attempts in translation theory to define and contextualize ideal translator competence, student translator competence, and general translation strategies. Beeby Lonsdale completes her book by applying her conclusions to selecting and organizing the content of teaching translation from Spanish to English. She illustrates one or more of the basic translation principles through 29 teaching units, which are prefaced by objectives, tasks, and commentaries for the teacher, and through 48 task sheets, which show how to present the material to students.

Internationally acclaimed novelist Mario Vargas Llosa has contributed a biweekly column to Spain's major newspaper, El País, since 1977. In this collection of columns from the 1990s, Vargas Llosa weighs in on the burning questions of the last decade, including the travails of Latin American democracy, the role of religion in civic life, and the future of globalization. But Vargas Llosa's influence is hardly limited to politics. In some of the liveliest critical writing of his career, he makes a pilgrimage to Bob Marley's shrine in Jamaica, celebrates the sexual abandon of Carnaval in Rio, and examines the legacies of Vermeer, Bertolt Brecht, Frida Kahlo, and Octavio Paz, among others.

"We know by now that you have to work to get a girl to orgasm, and I mean a genuine orgasm. The sad truth is that most women end up faking an orgasm to avoid the awkward tension when her male knows he hasn't got her there. But not anymore. You now finally understand that the female orgasm is about more than just the physical act and you now know pretty much all you're going to need to get to that wonderful place." "I want you to remember exactly that. The orgasm isn't purely physical; the emotional and psychological elements are still so, so important. It's possible for a person to orgasm without even being touched. It's hard, sure, but it is certainly possible. I just need to demonstrate to you the significance of the mind here. It's a key part of getting a female to her ultimate climax. Think about tantric sex. Now, you might not know a lot about tantric sex, but the idea is that sex is considered virtually spiritual in nature - it's linked to a higher state of being. So clearly sex is more than the mere physical act of stimulating the nerves." "If you're successful here, then the chances are that she won't have anything to say - she will quite literally become speechless! When a female experiences such a hard orgasm she physically won't be able to say anything! She will be so overwhelmed by the sensation that there is no need for words. If you accomplish this then well done, you've done what very few guys ever manage to accomplish because they simply don't know or understand how to. But you do." Want to know more and learn 101 exciting sex positions? You know what to do.

Research shows that, when learning a new language, students who read for pleasure make the most progress on vocabulary acquisition and are better at understanding grammar structures. After several years of delivering audio and video lessons online, Spanish To Move(R) is publishing this book, which follows its unique formula: interesting stories carefully prepared to create subconscious patterns in the students. In this context, these stories will help you learn or practice Spanish, acquire new vocabulary, and go over the most used grammar structures without even thinking about grammar. Also, by focusing on short texts, you will remain engaged, focused and motivated when you achieve specific learning goals. This book offers 39 stories designed to take you from simple to complex grammar structures, on a variety of topics. You will find inspiring and motivational stories, as well as anecdotes on many subjects, ranging from geography and nature to history, psychology, and philosophy. The stories have been written mostly in present, past and future tenses, for beginner and intermediate students (levels A2, B1, and B2 of the Common European Framework of Reference for Languages).

Research in Colonial and Postcolonial Linguistics has experienced a significant increase in contributions from varying fields of language studies, gaining the attention of scholars from all over the world. This volume aims to showcase the variety of topics relevant to the study of language(s) in colonial, postcolonial and decolonial contexts. A main reason of this variety is that the new paradigm invites and necessitates research on different subject matters such as language typology, grammar and cross-linguistics, meta-linguistics and research on language ideology, discourse analysis and pragmatics. The contributions of this volume are selected, peer-reviewed papers which were partly invited and partly given at the First Bremen Conference on Colonial and Postcolonial Linguistics, held in September 2013.

The book analyzes the place of religious difference in late modernity through a study of the role played by Jews and Muslims in the construction of contemporary Spanish national identity. The focus is on the transition from an exclusive, homogeneous sense of collective Self toward a more pluralistic, open and tolerant one in an European context. This process is approached from different dimensions. At the national level, it follows the changes in nationalist historiography, the education system and the public debates on national identity. At the international level, it tackles the problem from the perspective of Spanish foreign policy towards Israel and the Arab-Muslim states in a changing global context. From the social-communicational point of view, the emphasis is on the construction of the Self–Other dichotomy (with Jewish and Muslim others) as reflected in the three leading Spanish newspapers.

An analysis of contemporary violence as the new commodity of today's hyper-consumerist stage of capitalism. "Death has become the most profitable business in existence." —from Gore Capitalism Written by the Tijuana activist intellectual Sayak Valencia, Gore Capitalism is a crucial essay that posits a decolonial, feminist philosophical approach to the outbreak of violence in Mexico and, more broadly, across the global regions of the Third World. Valencia argues that violence itself has become a product within hyper-consumerist neoliberal capitalism, and that tortured and mutilated bodies have become commodities to be traded and utilized for profit in an age of impunity and governmental austerity. In a lucid and transgressive voice, Valencia unravels the workings of the politics of death in the context of contemporary networks of hyper-consumption, the ups and downs of capital markets, drug trafficking, narco-power, and the impunity of the neoliberal state. She looks at the global rise of authoritarian governments, the erosion of civil society, the increasing violence against women, the deterioration of human rights, and the transformation of certain cities and regions into depopulated, ghostly settings for war. She offers a trenchant critique of masculinity and gender constructions in Mexico, linking their misogynist force to the booming trade in violence. This book is essential reading for anyone seeking to analyze the new landscapes of war. It provides novel categories that allow us to deconstruct what is happening, while proposing vital epistemological tools developed in the convulsive Third World border space of Tijuana.
