This resource continues where Trofimenko's original work left off. It not only includes discussions on all new ligands reported from 1999 to date, but also introduces new ligands, such as scorpionates based on S donors or P donors. As such, this volume is a 'must-have' for all researchers who use this family of molecules.

Brutified is a collection of poetry written by the author Robert Benefiel. The poems contained within it are from a larger cache of poems written in 2019. The pieces themselves range from narrative to abstract, bibliographical to fictionalized, allowing for a fuller range of expression and voice. What each piece carries is the idea of surviving the brutality of the world, others, and even one's self, in hopes of gaining insight and retaining one's compassion. Whether the piece is addressing the idea of finding one's own art at a junk store, or stumbling across a love note written before, but after, a lover has left them, or even watching a young midget be chased through the mall, the author never ceases to try and present the emotion and meaning at the core of each piece in a blatant yet subtle way.

Ear Rent is a new book of poetry by the author and artist Robert Benefiel. The title is derived from suggesting the price one pays to get the attention of another, as well as having been used as a term to have one's ear cut off to pay back a debt. By titling this new collection of poetry Ear Rent he understands he is asking the reader to stop and listen to what he has to say, but that he is also paying off his debt to society by giving it back the poems it influences. Derived from no one style, the work can come from completely surreal vestiges, or from plain and ordinary circumstances. Whether looking at a rubber toy staring at him from the bottom of a bathtub, relaying a news article, or enjoying the beauty of a surreal moment of hickory trees being on fire, each poem represents just one of the many ways the author is responding to the world tapping on his shoulder and asking for the time.

2015 Reprint of 1931 Edition. Full Facsimile of the original edition. Not reproduced with Optical Recognition Software. The father of modern quality control, Walter A. Shewhart brought together the disciplines of statistics, engineering, and economics in a simple but highly effective tool: the control chart. This technique, and the principles behind it, has played a key role in economic development from the 1940's through to the present day. Most of Shewhart's professional career was spent at Western Electric as an engineer from 1918 to 1924 and at Bell Telephone Laboratories from 1925 until his retirement in 1956. In addition, he served for more than 20 years as the first editor of the Mathematical Statistics Series published by John Wiley & Sons.

In Transforming the Mainline Church, Robert Chesnut provides valuable lessons for inner-city churches. He urges congregations to be more open to diversity, to emphasize the arts and music, to support entrepreneurial leadership, and to move beyond denominational concerns to an approach that responds to the religious hungers of a new generation.

This is the story of Melody Paradise. You'll like her - everybody does. Women aspire to be like her and men fall in love with her. Melody is kind, spiritual and very beautiful. She's also on a mission... and nothing is going to stand in her way. The traveling community to which she belongs has become horribly fragmented by a series of mysterious and chaotic happenings. Her mission is to reunite them. She organises a festival as the perfect vehicle to bring them together, during which an amazing story unfolds, often funny, sometimes sad, always compelling... and with a twist in the tail. Through the words and eyes of Martin Millar, the reluctant guest novelist at Melody's festival, we become privileged observers of a world that most of us would struggle to even imagine.
