The MS 211 uses advanced
technology in the form of a powerful
low-emission, fuel-efficient engine. But
it doesn't stop there. It also reduces
your maintenance with a professionally
inspired pre-separation air filtration
system (extending air filter life up to
five times longer).

systems, improved graphical presentations, and most advanced calculation and simulation tools.

Postharvest losses of fresh produce have always been an obstacle in agriculture. About one third of global fresh fruits and vegetables are lost because their quality has dropped below an acceptance limit. The postharvest quality and shelf life of fresh produce are also determined before harvest. However, postharvest quality is also affected by many practices during and after harvest such as temperature management, controlled and modified atmosphere, coatings, physical treatments, biocontrol, and more. This Special Issue on “Postharvest Disease
