Now in paperback, the acclaimed Holocaust memoir declared "a book of breathtaking honesty and extraordinary insight."--LA Times

Swept up as a child in the events of Nazi-era Europe, Ruth Kluger saw her family's comfortable Vienna existence systematically undermined and destroyed. By age eleven, she had been deported, along with her mother, to Theresienstadt, the first in a series of concentration camps which would become the setting for her precarious childhood. Kluger's story of her years in the camps and her struggle to establish a life after the war as a refugee survivor in New York, has emerged as one of the most powerful accounts of the Holocaust. Interwoven with blunt, unsparring observations of childhood and nuanced reflections of an adult who has spent a lifetime thinking about the Holocaust, *Still Alive* rejects all easy assumptions about history, both political and personal. Whether describing the abuse she met at her own mother's hand, the life-saving generosity of a woman SS aide in Auschwitz, the foibles and prejudices of Allied liberators, or the cold shoulder offered by her relatives when she and her mother arrived as refugees in New York, Kluger sees and names an unexpected reality which has little to do with conventional wisdom or morality tales. *Still Alive* is a memoir of the pursuit of selfhood against all odds, a fiercely bittersweet coming-of-age story in which the protagonist must learn never to rely on comforting assumptions, but always to seek her own truth.

From clandestine images of Jewish children isolated in Nazi ghettos and Japanese American children incarcerated in camps to images of Native children removed to North American boarding schools, classroom photographs of schoolchildren are pervasive even in repressive historical and political contexts. *School Photos in Liquid Time* offers a closer look at this genre of vernacular photography, tracing how photography advances ideologies of social assimilation as well as those of hierarchy and exclusion. In Marianne Hirsch and Leo Spitzer's deft analysis, school photographs reveal connections between the histories of persecuted subjects in different national and imperial centers. Exploring what this ubiquitous and mundane but understudied genre tells us about domination as well as resistance, the authors examine school photos as documents of social life and agents of transformation. They place them in dialogue with works by contemporary artists who reframe, remediate, and elucidate them. *Ambitious yet accessible, School Photos in Liquid Time* presents school photography as a new access point into institutions of power, revealing the capacity of past and present actors to disrupt and reinvent them.

This clarion call to the Jewish community explores the purpose, possibilities, and limitations of peoplehood as a unifying concept of community for a people struggling profoundly with Jewish identity. It defines what peoplehood is--and is not--and explores both collective and personal Jewish identity and the natue of identity construction.

An engaging, critical study of Hugh Hood's ambitious twelve-volume novel-series.

Making War at Fort Hood offers an illuminating look at war through the daily lives of the people whose job it is to produce it. Kenneth MacLeish conducted a year of intensive fieldwork among soldiers and their families at and around the US Army's Fort Hood in central Texas. He shows how war's reach extends far beyond the battlefield into military communities where violence is as routine, boring, and normal as it is shocking and traumatic. Fort Hood is one of the largest military installations in the world, and many of the 55,000 personnel based there have served multiple tours in Iraq and Afghanistan. MacLeish provides intimate portraits of Fort Hood's soldiers and those closest to them, drawing on numerous in-depth interviews and diverse ethnographic material. He explores the exceptional position that soldiers occupy in relation to violence--not only trained to fight and kill, but placed deliberately in harm's way and offered up to die. The death and destruction of war happen to soldiers on purpose. MacLeish interweaves gripping narrative with critical theory and anthropological analysis to vividly describe this unique condition of vulnerability. Along the way, he sheds new light on the dynamics of military family life, stereotypes of veterans, what it means for civilians to say "thank you" to soldiers, and other questions about the sometimes ordinary, sometimes agonizing labor of making war. *Making War at Fort Hood* is the first ethnography to examine the everyday lives of the soldiers, families, and communities who personally bear the burden of America's most recent wars.
