Johann Sebastian Bach (1685 – 1750) was a German musician and composer during the Baroque period. He based his work on existing German styles but often adopted and adapted textures, rhythms, and forms from other countries, especially from Italy and France. Although his music was celebrated for its technical mastery, artistic beauty, and intellectual profundity during his lifetime, it was not until the 19th century that he was considered a great composer. Today, he is generally recognised as being one of the most important composers to have ever lived. Classic Music Collection constitutes an extensive library of the most well-known and universally-enjoyed works of classical music ever composed, reproduced from authoritative editions for the enjoyment of musicians and music students the world over.

Each of Bach's six French suites is written in a different key with no harmonic relationship to one another, unlike most of his other works. Within each suite, all of the movements are in the same key and follow standard binary form. In the traditional Baroque suite, there are four movements: Allemande, Courante, Sarabande, and Gigue. However, Bach also includes lesser-used dances such as the Polonaise, Bourée, and Air. Noted Bach expert Dr. Hans Bischoff edited this collection. Learning musics organizing principles . . . Approaching the study of form as an exercise in perceiving the interaction of a number of discrete musical events, Spencer and Temkos book embodies much more than a search for visual clues. Students of form develop perceptual tools that allow them to proceed from the aural experience to an understanding of the arch-principles upon which music is organized. The authors hold that the organizing principles of a given piece of music may be gleaned from studying the internal attributes that give a section its specific identity, the functional relations between sections, and the ordering of those sections.
