A first-rate organizational business plan demands an understanding of the dynamics behind remuneration, joint ventures, partnerships, alliances, major contracts; in fact, all of the commercial imperatives that will define success or failure over a five-year (or longer) period. And realizing this plan will involve complex and often multi-level or multi-party negotiations. The scale and context of these negotiations requires a level of strategic awareness because the interests of the parties are more complex, the options more numerous, and the outcomes more critical than at a tactical level. Strategic Negotiation is written for senior executives who provide input to or assessment of their organization's medium or long-term planning process, and who are engaged in implementing any aspects of their organization's plans. Part One focuses on the foundations of strategic negotiation: the commercial imperatives - what the organization must do to restructure and resource its operations to achieve commercial success - and the negotiation strategies associated with each. It also explains the logistics of managing complex public and private sector negotiations. Part Two includes the tools for successful negotiation: bid strategies; techniques for analyzing your position before you start and reassessing it during the negotiation; and the negotiation agenda and how to design and compile it. If you are operating at a senior level where negotiations are, by their nature, high value, complex, multi-level and often multi-party, what better guide than Gavin Kennedy, a long-standing world expert on negotiation, and his book Strategic Negotiation?

This perennial bestseller gives managers at every level exactly what they need to know for negotiating. There are multiple choice self-assessment tests at the start of each chapter with author answers given at the end of the chapter, with a suggested score. Other features include helpmail service for readers -

As a result, there are almost as many 'patented' techniques for negotiation as there are managers, each proclaiming to be the definitive route to success. The authors behind these techniques keep their work very much to themselves. Their fundamentally different approaches to negotiation remain in isolation from each other, as if their authors were too polite to contradict others in the field. In most cases, when you are developing your negotiation skills, this leaves you with a stark choice: pick a single technique and ignore the rest. Until now ... It is a readable and reliable guide to all that is best in the various contributions to negotiation training from authors such as John Nash, Walton and McKersie, Atkinson, Nierenberg, Rubin and Brown, Gottschalk, Karass, Fisher and Ury, and many more, including Gavin Kennedy himself.

Every organization enters into agreements for purchase and supply of goods and services, and most managers have some involvement in negotiating.
