It is vital for organisations to use company analysis to gain understanding of their limiting and enabling factors and strategic capabilities. Profits can then be maximised by selecting the most effective strategies, and through successful implementation of mergers, acquisitions and divestment opportunities. In this book Jenster and Hussey move away from the opinion based SWOT analysis commonly used, to provide a more objective step-by-step approach to objectively analysing an organisation. This important task is clearly explained, with information helpfully displayed in diagrams, and checklists of critical questions provided. In addition to the key, functional areas of management, corporate-wide approaches such as core competencies, critical success factors, industry analysis and the value chain are also examined. The book is illuminated with examples from the authors' own experiences, resulting in a practical and effective approach which will provide a foundation for corporate strategy and add a strategic dimension to a due diligence study - and so prove invaluable to MBA students and lecturers in strategic management. Every manager will be asked to participate in assessing strengths and weaknesses at some time in their career, and this book enables a considerable improvement to be made to many commonly used methods - and for those responsible for the development of strategies, it offers even more.

This work describes the application of management theories in STEM (Science, Technology, Engineering and Mathematics) education systems. Two chapters examine STEM education on the K-12 national level and one chapter focuses on the higher education institutional level. All chapters are based on comprehensive research. Thus, it will appeal to teachers, school principals, researchers, graduate students, government policymakers, and all practitioners who care about STEM education in schools, academia and government. In each chapter, SWOT (Strengths, Weaknesses, Opportunities, and Threats) analysis is used as a managerial strategic tool for the examination of factors that focus either on internal circumstances (strengths and weaknesses), or external ones (opportunities and threats).

Thousands of students graduate from university each year. The lucky few have the rest of their lives mapped out in perfect detail - but for most things are not nearly so simple. Armed with your hard-earned degree the possibilities and career paths lying before you are limitless, and the number of choices you suddenly have to make can seem bewildering. Life After...Engineering and Built Environment has been written specifically to help students currently studying, or who have recently graduated, make informed choices about their future. It will be source of invaluable advice and wisdom to graduates on where their degree can take them, covering such topics as: Identifying a career path that interests you - and how to start pursuing it The worldwide opportunities open to engineering graduates Staying motivated and pursuing your goals Networking and self-promotion Making the transition from scholar to worker The Life After University series of books are more than simple 'career guides'. They are unique in taking a holistic approach to career advice - recognising the increasing view that, although a successful working life is vitally important, other factors can be just as essential to happiness and fulfilment. They are the indispensable handbooks for students considering their future direction.

Debates in Physical Education explores major issues physical education teachers encounter in their daily professional lives. It engages with established and contemporary debates, promotes and supports critical reflection and aims to stimulate both novice and experienced teachers to reach informed judgements and argue their own point of view with deeper theoretical knowledge and understanding. In addition, concerns for the short, medium and long term future of the subject are voiced, with a variety of new approaches proposed. Key issues debated include: What are the aims of physical education? What should be covered in a physical education curriculum? How should we judge success in physical education? Is physical education really for all or is it just for the gifted and talented? Can physical education really combat the rise in obesity? What is the future for physical education in the 21st Century? Debates in Physical Education makes a timely and significant contribution to addressing current contentious issues in physical education. With its combination of expert opinion and fresh insight, this book is the ideal companion for all student and practising teachers engaged in initial teacher education, continuing professional development and Masters level study.
