History Alive! Pursuing American Ideals centers on the five founding ideals from the Declaration of Independence: equality, rights, liberty, opportunity, and democracy. Each generation has struggled with these ideals. Some have made little progress toward achieving them. Others have made great progress. This book invites students to become engaged in this struggle, from establishing an American republic to the making of modern America. --Website.

This practical resource shows you how to apply Sam Wineburgs highly acclaimed approach to teaching. "Reading Like a Historian," in your middle and high school classroom to increase academic literacy and spark students curiosity. Chapters cover key moments in American history, beginning with exploration and colonization and ending with the Cuban Missile Crisis.

Experiential exercises tap into students' intrapersonal and body-kinesthetic intelligences, allowing students to "experience" key social studies concepts firsthand.

This book introduces trainees and newly qualified teachers to the teaching of history in primary schools, and covers key concepts, skills and knowledge for the history curriculum at Foundation Stage, KS1 and KS2. Contents include planning, teaching and learning strategies, assessment, reflection and evaluation, as well as a range of practical ideas for classroom activities and cross-curricular themes. Each chapter is underpinned by national and international research, also included are links to important themes such as citizenship, out-of-school learning, sustainability, diversity and inclusive practice. Throughout, content is related to new initiatives such as Every Child Matters and Excellence and Enjoyment.

The fifth edition of this critically acclaimed approach to curriculum planning continues to receive accolades for its balanced presentation, pertinent case studies, and advice from practicing educators. It skillfully interweaves the themes of multicultural education, constructivism, and education reform. The author documents the latest trends, such as e-learning, blended learning and flipped learning, the controversial Common Core State Standards, and the impact of technology in our schools, including the BYOD (bring your own device) movement, digital citizenship, and technological literacy. This well-researched text spotlights ways to involve parents, students, and teachers in the curriculum-planning process and engages the reader in critical thinking and analysis about curriculum planning and education reform.

First released in the Spring of 1999, How People Learn has been expanded to show how the theories and insights from the original book can translate into actions and practice, now making a real connection between classroom activities and learning behavior. This edition includes far-reaching suggestions for research that could increase the impact that classroom teaching has on actual learning. Like the original edition, this book offers exciting new research about the mind and the brain that provides answers to a number of compelling questions. When do infants begin to learn? How do experts learn and how is this different from non-experts? What can teachers and schools do-with curricula, classroom settings, and teaching methods--to help children learn most effectively? New evidence from many branches of science has significantly added to our understanding of what it means to know, from the neural processes that occur during learning to the influence of culture on what people see and absorb. How People Learn examines these findings and their implications for what we teach, how we teach it, and how we assess what our children learn. The book uses exemplary teaching to illustrate how approaches based on what we now know result in in-depth learning. This new knowledge calls into question concepts and practices firmly entrenched in our current education system. Topics include: How learning actually changes the physical structure of the brain. How existing knowledge affects what people notice and how they learn. What the thought processes of experts tell us about how to teach. The amazing learning potential of infants. The relationship of classroom learning and everyday settings of community and workplace. Learning needs and opportunities for teachers. A realistic look at the role of technology in education.

Packed with essential forms, letters, charts, and checklists, this easy-to-use kit offers solutions for virtually any leadership or administrative challenge that elementary school principals commonly face.

These books provide a constructive, highly accessible and, above all, practical introduction to the teaching of Geography and History in early years and primary settings. In particular, they prepare initial teacher training students to meet government requirements for entry into the teaching profession. These are comprehensive guides to: o Geographical and historical knowledge and understandingo Planning, teaching and class managemento Monitoring, assessment, recording, reporting and accountabilityo General professional requirements>

This book provides an introduction to the theory and practice of teaching History to years 7-12 in Australian schools.

Exploring issues of student agency, equity, assessment, teaching, management, teacher leadership, and use of technology, this book provides strategies, tips, and guidance for enacting innovative change in today's schools. Drawing from unique and creative approaches at international schools, real practitioners share their stories and best-practices. Chapters contain engaging snapshots of the innovative practices currently happening in international schools, translate those practices into leadership actions, and show how those innovations are played out in localized contexts. This exciting book is for every school and district leader keen to think outside the box, reassess their schools' strengths, and improve the purposes and means by which they educate students.
