This updated edition of Teaching Students with Severe Disabilities, is written in a way that makes the most complex findings of research understandable and usable in the real educational world. Drawing on their own experiences, the authors bring a level of currency and reality to the book that is unparalleled. This book offers comprehensive coverage of all of the issues that are pertinent to teaching students with severe disabilities. The authors clearly and completely address both methodology and curriculum, presenting topics in the order in which a teacher would approach them: prior considerations, planning and assessment, general instructional procedures, and, finally, procedures targeted to learners with specific disabling conditions. In addition, they pay thoughtful attention to assessment, the role of paraprofessionals, and multicultural concerns.

This essential text and practitioner guide is unique in its emphasis on fostering academic learning as well as life skills. In-depth chapters cover reading, mathematics, science, and social studies, as well as health care needs, communication and social skills, daily living, and job skills. The expert authors present research-based best practices for assessing each student's needs and crafting individualized education plans that build a strong foundation for life in the community. User-friendly features include engaging vignettes, sample lesson plans, and reproducible checklists and forms. The text is a contemporary follow-up to Diane M. Browder's widely adopted Curriculum and Assessment for Students with Moderate and Severe Disabilities.

"For years the text of choice for developing excellence as a teacher of K-12 students with moderate and severe disabilities, this clearly written work has now been revised and updated. Chapters provide step-by-step procedures for designing standards-based individualized education plans and evaluating and enhancing student progress. Methods and materials for teaching literacy, mathematics, science, and social studies are described in depth. The book also describes effective ways to build functional daily living skills. User-friendly features include extensive vignettes and classroom examples, end-of-chapter application exercises, and reproducible planning and assessment tools. Purchasers get access to a Web page where they can download and print the reproducible materials in a convenient 8 1/2" x 11" size. Subject Areas/Key words: special education, children, adolescents, special-needs learners, disabled, moderately, severely, developmental disorders, academic interventions, academic skills, life skills, intellectual disability, cerebral palsy, autism spectrum disorders, learning disabilities, physical disabilities, inclusion classrooms, systematic instruction, special educators, teachers, literacy, reading, mathematics, textbooks, texts Audience: Students in special education and school psychology; K-12 special educators, school psychologists, reading specialists, classroom teachers, and administrators"--

Written in a way that makes the most complex findings of research understandable and usable in the real educational world, this book offers comprehensive coverage of all of the issues that are pertinent to teaching students with severe disabilities. The authors clearly and completely address both methodology and curriculum, presenting topics in the order in which a teacher would approach them: prior considerations, planning and assessment, general instructional procedures, and, finally, procedures targeted to learners with specific disabling conditions. In addition, they pay thoughtful attention to assessment, the role of paraprofessionals, and multicultural concerns. For teachers and future teachers of students with severe/multiple disabilities.

This is a comprehensive and current description of research-based methods on teaching students with severe disabilities including students with autism and functional skill needs. A great reference book. Reflects 1997 IDEA in all chapters, particularly those that deal with the topics of transition and families. Adds a

chapter on peer/social relationships. Creates and maintains reader interest with effective photographs, vignettes, specific charts, and unique figures/tables. Reinforces its comprehensive research base with current studies. For educators and school administrators.

This resource offers ideas and information on including students with sensory impairments and cognitive and physical disabilities in regular classrooms. This second edition covers recent issues and strategies such as alternate assessment and block scheduling, provides separate chapters on inclusion

This text is appropriate for Severe or Multiple Disabilities Methods courses. This text provides comprehensive coverage of all the issues pertinent to teaching students with severe disabilities. Covering both methodology and curricular areas, topics are presented in the chronological order in which a teacher would approach them: Prior considerations, planning and assessment, general instructional procedures, and finally, procedures specific to teaching specific skills.

Featuring sample lessons, information on finding age-appropriate materials, and more, this guide helps teachers create thematic units that build literacy skills in students with significant disabilities.

"This textbook is an essential guide for educators and other school-based staff to teach students with significant disabilities the necessary skills to communicate with those around them. This book shows readers how to analyze environments for their communicative value, assess students' communication skills, teach specific skills such as gaining attention and requesting, make informed choices about augmentative and alternative communication (AAC), and guide peers and adults in supporting students with disabilities"--

Packed with instructional strategies for students with significant disabilities, this research-based resource helps teachers adapt their curriculum, work collaboratively, develop accurate assessments, track student progress, and more.
