Material Safety Data Sheets focus primarily on SAFETY. In general they provide little additional information on the product or its use and have limited use (if any) for the person designing a cleaning process. A typically more valuable vehicle for information is the product data, “ brand, ” or technical data sheet.

The book covers the topic of geopolymers, in particular it highlights the relationship between structural differences as a result of variations during the geopolymer synthesis and its physical and chemical properties. In particular, the book describes the optimization of the thermal properties of geopolymers by adding micro-structural modifiers such as fibres and/or fillers into the geopolymer matrix. The range of fibres and fillers used in geopolymers, their impact on the microstructure and thermal properties is described in great detail. The book
