What's the worst thing you can hear when you have a good idea at work? "That's not how we do it here!" In their iconic bestseller *Our Iceberg Is Melting*, John Kotter and Holger Rathgeber used a simple fable about penguins to explain the process of leading people through major changes. Now, ten years later, they're back with another must-read story that will help any team or organization cope with their biggest challenges and turn them into exciting opportunities. Once upon a time a clan of meerkats lived in the Kalahari, a region in southern Africa. After years of steady growth, a drought has sharply reduced the clan's resources, and deadly vulture attacks have increased. As things keep getting worse, the harmony of the clan is shattered. The executive team quarrels about possible solutions, and suggestions from frontline workers face a soul-crushing response: "That's not how we do it here!" So Nadia, a bright and adventurous meerkat, hits the road in search of new ideas to help her troubled clan. She discovers a much smaller group that operates very differently, with much more teamwork and agility. These meerkats have developed innovative solutions to find food and evade the vultures. But not everything in this small clan is as perfect as it seems at first. Can Nadia figure out how to combine the best of both worlds—a large, disciplined, well-managed clan and a small, informal, inspiring clan—before it's too late? This book distills Kotter's decades of experience and award-winning research to reveal why organizations rise and fall, and how they can rise again in the face of adversity.

Lucy knows how to do everything. All her friends ask her for help if they need to know the right way to do something. When Toshi arrives, Lucy thinks he can't do anything properly at all. She can barely hide her frustration. When she finally tries to teach Toshi the right way to do things, she learns a very important lesson herself.

Most of the denizens of the Antarctic penguin colony sneer at Fred, the quiet but observant scout who detects worrying signs that their home, an iceberg, is melting. Fred must cleverly convince and enlist key players, such as Louis, the head penguin; Alice, the number two bird; the intractable NoNo the weather expert; and a passle of school-age penguins if he is to save the colony. Their delightfully told journey illuminates in an unforgettable way how to manage the necessary change that surrounds us all. Simple explanatory material following the fable enhances the lasting value of these lessons. *Our Iceberg Is Melting* is at once charming, accessible and profound; a treat for virtually any reader.

In his international bestseller "*Leading Change*," Kotter provided an action plan for implementing successful transformations. Now, he shines the spotlight on the crucial first step in his framework: creating a sense of urgency by getting people to actually see and feel the need for change.

You've got a good idea. You know it could make a crucial difference for you, your organization, your community. You present it to the group, but get confounding questions, inane comments, and verbal bullets in return. Before you know what's happened, your idea is dead, shot down. You're furious. Everyone has lost: Those who would have benefited from your proposal. You. Your company. Perhaps even the country. It doesn't have to be this way, maintain John Kotter and Lorne Whitehead. In *Buy-In*, they reveal how to win the support your idea needs to deliver valuable results. The key? Understand the generic attack strategies that naysayers and obfuscators deploy time and time again. Then engage these adversaries with tactics tailored to each strategy. By "inviting in the lions"

to critique your idea--and being prepared for them--you'll capture busy people's attention, help them grasp your proposal's value, and secure their commitment to implementing the solution. The book presents a fresh and amusing fictional narrative showing attack strategies in action. It then provides several specific counterstrategies for each basic category the authors have defined--including:

- Death-by-delay: Your enemies push discussion of your idea so far into the future it's forgotten.
- Confusion: They present so much data that confidence in your proposal dies.
- Fearmongering: Critics catalyze irrational anxieties about your idea.
- Character assassination: They slam your reputation and credibility.

Smart, practical, and filled with useful advice, Buy-In equips you to anticipate and combat attacks--so your good idea makes it through to make a positive change.

This is not just another happiness book. In *Happiness by Design*, happiness and behavior expert Paul Dolan combines the latest insights from economics and psychology to illustrate that in order to be happy we must behave happy. Our happiness is experiences of both pleasure and purpose over time and it depends on what we actually pay attention to. Using what Dolan calls deciding, designing, and doing, we can overcome the biases that make us miserable and redesign our environments to make it easier to experience happiness, fulfillment, and even health. With uncanny wit and keen perception, Dolan reveals what we can do to find our unique optimal balance of pleasure and purpose, offering practical advice on how to organize our lives in happiness-promoting ways and fresh insights into how we feel, including why:

- Having kids reduces pleasure but gives us a massive dose of purpose
- Gaining weight won't necessarily make us unhappier, but being too ambitious might
- A quiet neighborhood is more important than a big house

Vividly rendering intriguing research and lively anecdotal evidence, *Happiness by Design* offers an absorbing, thought-provoking, new paradigm for readers of *Stumbling on Happiness* and *The How of Happiness*.
