best learned through trial and error. Advanced Reporting takes the opposite approach, focusing on reporting as a process of triangulation based on three essential activities: analyzing documents, making observations and conducting interviews. In this readable book, veteran journalism professor Miles Maguire shows how the best reporters use these three tools in a way that allows them to cross-check and authenticate facts, to reduce or eliminate unsupportable allegations and to take readers and viewers to a deeper level of insight and understanding. This book will help to prepare students for a profession marked by increasing complexity and competition. To succeed in this environment, journalists must learn to make the most of digital media to intensify the impact of their work. At the same time, reporters must contend with a host of sophisticated public relations techniques while engaging with news audiences that no longer just consume journalism, but also collaborate in its creation. Discussion questions and exercises help students put theory into practice.

Featuring a new code of ethics for journalists and essays by 14 journalism thought leaders and practitioners, *The New Ethics of Journalism: Principles for the 21st Century*, by Kelly McBride and Tom Rosenstiel, examines the new pressures brought to bear on journalism by technology and changing audience habits. It offers a new framework for making critical moral choices, as well as case studies that reinforce the concepts and principles rising to prominence in 21st century communication. The book addresses the unique problems facing journalism today, including how we arrive at truth in an era of abundant and unverified information; the evolution of new business models and partnerships; the presence of journalists on independent social media platforms; the role of diversity; the meaning of stories; the value of images; and the role of community in the production of journalism.

The emergence of 'new media' and social media is widely discussed in contemporary society. However, media and public communication are mostly analyzed within particular theoretical frameworks and within specific disciplinary fields. Such approaches have created polarized views on media and communication, and fail to create an understanding of the interdependencies between these fields. This book expertly synthesizes competing theories and disciplinary viewpoints, integrates scholarly and cutting edge research, and examines international data from fast-growing markets including China, to provide a comprehensive, holistic view of the twenty-first century (r)evolution in media and public communication. The book identifies how the changes are located in practices rather than technologies and that these practices are emergent in highly significant ways. Engaging and accessible, the book is essential reading for media scholars and communication professionals, and a valuable text for courses in media studies, journalism, advertising, public relations, and organisational and political communication.

*Media Perspectives for the 21st Century* brings together key international scholars to explore concepts, topics and issues concerning the communication environment in contemporary democratic societies. It combines qualitative and quantitative approaches to provide an interdisciplinary and truly global perspective that reflects the trends, theories and issues in current media and communication research. The collection raises significant questions about the study of the media by challenging approaches to major media and societal issues, and analyses in more depth the range of concerns that shape both the present and the future media landscape and the issues these can create for communication. It also investigates the main effects of technological developments on the domain of the news media and journalism. Divided into two main sections, Part I provides accounts of the role of the media in society, and deals with agendas that affect the field of
