The economic literature on international migration interests policymakers as well as academics throughout the social sciences. These volumes, the first of a new subseries in the Handbooks in Economics, describe and analyze scholarship created since the inception of serious attention began in the late 1970s. This literature appears in the general economics journals, in various field journals in economics (especially, but not exclusively, those covering labor market and human resource issues), in interdisciplinary immigration journals, and in papers by economists published in journals associated with history, sociology, political science, demography, and linguistics, among others. Covers a range of topics from labor market outcomes and fiscal consequences to the effects of international migration on the level and distribution of income ¶ and everything in between. Encompasses a wide range of topics related to migration and is multidisciplinary in some aspects, which is crucial on the topic of migration Appeals to a large community of scholars interested in this topic and for whom no overviews or summaries exist

What guidance does academic research really provide to economic policy development? The critical and analytical surveys in this volume investigate links between policies and outcomes by surveying work from broad macroeconomic policies to interventions in microfinance. Asserting that there are no universal correspondences between policies and outcomes, contributors demonstrate instead that only an intense familiarity with the development context and the universe of applicable economic models can generate successful policies. Getting cause-and-effect right is essential for policy design and implementation. With the goal of drawing researchers and policy makers closer, this volume highlights our increasing understanding of ways to combine economic theorizing with careful, thoughtful empirical work. \* Presents an accurate, self-contained survey of the current state of the field \* Summarizes the most recent discussions, and elucidates new developments \* Although original material is also included, the main aim is the provision of comprehensive and accessible surveys

The purpose of the 'Microfinance Handbook' is to bring together in a single source guiding principles and tools that will promote sustainable microfinance and create viable institutions.

In the last 20 years, the need for a financial expert to act as a witness and consultant to litigating attorneys has grown even more than litigation itself. Twenty years ago, few certified public accountants or economists offered litigation-related services; now, a large number devote much of their practice to this area. To be litigation service practitioners and accountants need to learn or enhance their litigation skills, including the fine points of their roles in trial preparation and testimony presentation, testimony presentation, deposition, direct examination, cross examination, understanding Sarbanes-Oxley rulings, and fraud investigations.

Providing forty articles written by experts, this book explores the development of government spending and revenue policymaking, the legacy of John Maynard Keynes, taxes and tax policies, government budgeting and accounting, and government debt management. It covers the role of government in formulating economic policies for growth and full employment and reviews issues associated with the implementation of fiscal policies.

Cross-disciplinary and critical in its approach, The SAGE Handbook of Housing Studies is an elucidating look at the key issues within the field. It covers the study of housing retrospectively, but also analyses the future directions of research and theory, demonstrating how it can contribute to wider debates in the social sciences. A comprehensive introductory chapter is followed by four parts offering complete coverage of the area: Markets: examines the perception of housing markets, how they function in different contexts, and the importance of housing behaviour and neighbourhoods Approaches: looks at how other disciplines - economics, geography, and sociology - have informed the direction of housing studies Context: traces the interactions between housing studies and other aspects of society, providing context to debate housing through issues of space, social, welfare and the environment. Policy: is a multi-disciplinary and comprehensive take on the major policy issues and the causes and possible solutions of housing problems such as regeneration and homelessness. Edited by leading names in the field and including international contributions, the book is a stimulating, wide-ranging read that will be an invaluable resource for academics and researchers in geography, urban studies, sociology, social policy, economics and politics.
