An essential guide to understanding the dynamics of a startup's board of directors Let's face it, as founders and entrepreneurs, you have a lot on your plate—getting to your minimum viable product, developing customer interaction, hiring team members, and managing the accounts/books. Sooner or later, you have a board of directors, three to five (or even seven) Type A personalities who seek your attention and at times will tell you what to do. While you might be hesitant to form a board, establishing an objective outside group is essential for startups, especially to keep you on track, call you out when you flail, and in some cases, save you from yourself. In *Startup Boards*, Brad Feld—a Boulder, Colorado-based entrepreneur turned-venture capitalist—shares his experience in this area by talking about the importance of having the right board members on your team and how to manage them well. Along the way, he shares valuable insights on various aspects of the board, including how they can support you, help you understand your startup's milestones and get to them faster, and hold you accountable. Details the process of choosing board members, including interviewing many people, checking references, and remembering that there should be no fear in rejecting a wrong fit Explores the importance of running great meetings, mixing social time with business time, and much more Recommends being a board member yourself at some other organization so you see the other side of the equation Engaging and informative, *Startup Boards* is a practical guide to one of the most important pieces of the startup puzzle.

Venture Capital is a marriage between 'people with money and no ideas' and 'people with ideas and no money'. It is a high-risk investment vehicle with the potential for manifold returns and the possibility of a complete investment written-off. Although it is essentially private money and smaller in size than traditional financing pillars, its impact has been phenomenal, even to the extent of transforming the way we live in the modern world. Yet the fact remains that the business of venture capital is not fully understood by startup founders and fund managers are also not familiar with the inner workings of other venture funds. And, as more public or tax-players' money flows into this asset class, it begs a shift from the existing esoteric styles to more transparent and predictable operations. It would also be beneficial if the craft of venture capital is well understood by the business community and most importantly, policymakers as *Demystifying Venture Capital: How it works and How to get* primarily written to address these concerns, and to explain the subject in a nontechnical manner, as far as possible. A handbook for fund managers, startups, academicians interested in the subject, policy makers, and aspiring entrepreneurs, this book is unique as it has been written along with the top 25 venture funds in India as co-authors. The first part builds the concepts and theoretical framework of venture investing throughout the venture capital life cycle, giving readers a robust academic backdrop while the second part offer 25 first-hand accounts of how VCs invest, where they invest, what they look for while investing, providing invaluable insights into the minds and methods of VCs. All in all, this prototype is a first-of-its-kind endeavour to deliver a 360-degree + view of the Venture Capital universe.
