Meeting a key need for teachers, this book provides practical, data-based tools for helping students with attention-deficit/hyperactivity disorder (ADHD) succeed in the classroom. The authors combine instructional expertise with extensive knowledge about the nature and treatment of ADHD. Coverage includes ways to support students and teach them needed strategies in core areas: academic skills, behavior, self-regulation, and social skills. Step-by-step instructions and concrete examples help teachers implement effective interventions and accommodations. The book also offers crucial guidance for teaming with other school professionals and with parents.

Sponsored by the United Nations Development Programme on behalf of the UN Development Group.

The Millennium Development Goals, adopted at the UN Millennium Summit in 2000, are the world's targets for dramatically reducing extreme poverty in its many dimensions by 2015income poverty, hunger, disease, exclusion, lack of infrastructure and shelterwhile promoting gender equality, education, health and environmental sustainability. These bold goals can be met in all parts of the world if nations follow through on their commitments to work together to meet them. Achieving the Millennium Development Goals offers the prospect of a more secure, just, and prosperous world for all. The UN Millennium Project was commissioned by United Nations Secretary-General Kofi Annan to develop a practical plan of action to meet the Millennium Development Goals. As an independent advisory body directed by Professor Jeffrey D. Sachs, the UN Millennium Project submitted its recommendations to the UN Secretary General in January 2005. The core of the UN Millennium Project's work has been carried out by 10 thematic Task Forces comprising more than 250 experts from around the world, including scientists, development practitioners, parliamentarians, policymakers, and representatives from civil society, UN agencies, the World Bank, the IMF, and the private sector. Coming to Grips with Malaria in the New Millennium presents an innovative strategic framework for relieving the burden that malaria imposes on society through the implementation of tried and tested anti-malarial interventions designed to improve health nationally and to promote economic development locally. Recommendations include early diagnosis, treatment with effective anti-malarial medicines, the use of insecticide treated nets, indoor residual spraying, managing the environment, improving housing, extending health education and improving monitoring and evaluation systems.

Chasing Kites is unflinching look at growing up with ADHD at a time in which there was little to no awareness. If you want to know and feel what someone with ADHD goes through, there is not a better way to understand than Chasing Kites. Tom Nardone shares his personal stories in the most honest and genuine fashion. Some of which are hysterically funny, while others are quite moving and touching. Through these stories, Tom connects with his readers by actually explaining what was going through his mind, and/or his thought process at the time which they occurred. Tom, for more than half of his life, was not accepted by the majority of his peers.He did not fit into any of society's norms. This was evident in the fact he was bullied and picked on daily for his first 10 years of school, and the fact he was fired from more jobs than he can recount. Chasing Kites is not an ADHD manual. It is a true story that spans from kindergarten through high school and well into adulthood. It's a story of victory and defeat. It's a story of love and hate. Chasing Kites is the story of Tom Nardone going from being a troubled young boy to being a hero to so many others like him. "Tom writes with passion, sincerity, and honesty. I was moved to tears." Rick Green of "TotallyADD(c)" "There are a handful of people in the ADHD universe who can successfully combine biting humor with heart-wrenching truth to yield provocative prose that entertain while enlightening. Tom Nardone is one of the few." Alan Brown of "ADDCrusher(c)" and "CrusherTV(c)" "I have never read anything so vulnerable, so honest, so inspiring or funny. I highly recommend it." Laurie Dupar of "The International ADHD Coach Training Center(c)" "Gripping and compelling! I did not put it down until the end." Jennie Friedman of the "See in ADHD(c)" Podcast Tom Nardone is widely known in the ADHD community from his writing, interaction, and most notably "The Tom Nardone Show" which can be heard on iTunes(c) and iHeartRadio(c). Tom is an unapologetic fresh voice in the ADHD community, and is respected and loved for the entertaining attitude he takes toward his own ADHD. While for a long time it has been Tom Nardone's primary purpose to entertain his audience, this book is something very different. Tom loves ADHD people. It is primarily for them and their family and friends for whom he wrote Chasing Kites however, anyone who reads this will get something from it.

By focusing attention on individuals rather than on aggregates, this book takes a novel approach to studying criminal behavior. It develops a framework for collecting information about individual criminal careers and their parameters, reviews existing knowledge about criminal career dimensions, presents models of offending patterns, and describes how criminal career information can be used to develop and refine criminal justice policies. In addition, an agenda for future research on criminal careers is presented.

ADHD in children and adolescents is a neurodevelopmental disorder, which is recognized by the clinicians all over the world. ADHD is a clinical diagnosis based on reliable history, reports from home and school and a physical examination to rule out any other underlying medical conditions. ADHD can cause low self-esteem in the child and impair quality of life for the child and the family. It is known that ADHD is a chronic illness and that clinicians needed to use chronic illness principles in treating it. The last 10 years have seen an increase in the number of medications that have been approved for the treatment of ADHD. This book has tried to address some of the issues in ADHD.

A ground-breaking book on the needs and issues of girls with attentional problems: why they are often undiagnosed, how they are different from boys, and what their special needs are in school, in their social world and at home. Age-related checklists from pre-school to high school help parents and professionals better identify and help girls with AD/HD.

A revolutionary new approach to ADD/ADHD featuring cutting-edge research and strategies to help readers thrive, by the bestselling authors of the seminal books Driven to Distraction and Delivered from Distraction " An inspired road map for living with a distractible brain . . . If you or your child suffer from ADHD, this book should be on your shelf. It will give you courage and hope. " —Michael Thompson, Ph.D., New York Times bestselling co-author of Raising Cain World-renowned authors Dr. Edward M. Hallowell and Dr. John J. Ratey literally " wrote the book " on ADD/ADHD more than two decades ago. Their bestseller, Driven to Distraction, largely introduced this diagnosis to the public and sold more than a million copies along the way. Now, most people have heard of ADHD and know someone who may have it. But lost in the discussion of both childhood and adult diagnosis of ADHD is the potential upside: Many hugely successful entrepreneurs and highly creative people attribute their achievements to ADHD. Also unknown to most are the recent research developments, including innovations that give a clearer understanding of the ADHD brain in action. In ADHD 2.0, Drs. Hallowell and Ratey, both of whom have this " variable attention trait," draw on the latest science to provide both parents and adults with ADHD a plan for minimizing the downside and maximizing the benefits of ADHD at any age. They offer an arsenal of new strategies and lifestyle hacks for thriving with ADHD, including • Find the right kind of difficult. Use these behavior assessments to discover the work, activity, or creative outlet best suited to an individual 's unique strengths. • Reimagine environment. What specific elements to look for—at home, at school, or in the workplace—to enhance the creativity and entrepreneurial spirit inherent in the ADHD mind. • Embrace innate neurological tendencies. Take advantage of new findings about the brain 's default mode network and cerebellum, which confer major benefits for people with ADHD. • Tap into the healing power of connection. Tips for establishing and maintaining positive connection " the other Vitamind C " and the best antidote to the negativity that plagues so many people with ADHD. • Consider medication. Gets the facts about the underlying chemistry, side effects, and proven benefits of all the pharmaceutical options. As inspiring as it is practical, ADHD 2.0 will help you tap into the power of this mercurial condition and find the key that unlocks potential.

Diseases have a history, and understanding that history helps us understand how best to treat and control disease today. Today's students are confronted with a panoply of often-frightening illnesses and afflictions - the Biographies of Disease series provides students with the information that they need to understand the origin of various maladies, how they impact contemporary society, and how doctors and researchers from around the world are fighting to devise treatments to alleviate or cure these diseases. This volume, ADHD, examines Attention Deficit Hyperactivity Disorder, the controversial affliction with which millions of boys and girls are diagnosed every year.

The Barkley Adult ADHD Rating Scale-IV (BAARS-IV) offers an essential tool for assessing current ADHD symptoms and domains of impairment as well as recollections of childhood symptoms. Directly linked to DSM-IV diagnostic criteria, the scale includes both self-report and other-report forms (for example, spouse, parent, or sibling). Not only is the BAARS-IV empirically based, reliable, and valid, but it is also exceptionally convenient to use. The long version takes the average adult 5-7 minutes to complete, and the Quick Screen takes only 3-5 minutes. Special features include a section of items assessing the newly identified symptoms of sluggish cognitive tempo, also known as the inattentive-only subtype of ADHD. Complete instructions for scoring and interpreting the scale are provided. See also the Barkley Deficits in Executive Functioning Scale (BDEFS for Adults), which assesses clinically significant executive functioning difficulties, and the Barkley Functional Impairment Scale (BFIS for Adults), which evaluates 15 major domains of psychosocial functioning. Includes Permission to Photocopy Enhancing the convenience and value of the BAARS-IV, the limited photocopy license allows purchasers to reproduce the forms and score sheets and yields considerable cost savings over other available scales. The large format and sturdy wire binding facilitate photocopying.
