The Origins of the English Landscape (Dr Steven Bassett) We trace and analyse the history of the English landscape from c.300 to c.1100, and we relate it to major Anglo-Saxon political, socio-economic and ecclesiastical trends. We do this using a wide range of sources: eg Anglo-Saxon charters and Domesday Book, placenames, maps, and the surviving evidence embodied in the landscape itself ...

Dr Steven Dunbar, ex Special Forces medic and chief investigator with the Sci-Med Inspectorate, comes across apparent interference with front-line medical research in the UK. Funding for Professor Dorothy Lindstrom, a leading neuroscientist who has recently returned home to the UK after a tragic fire took the lives of two of her young colleagues at Yale University, has been completely blocked. Professor Lindstrom, a feisty character who has made more than a few enemies over the years, and her research group, who have been making dramatic progress in the new field of epigenetics which deals with genetic influences on human behaviour are upset and angry but feel helpless. One of the group, Dr Owen Barrowman who has been looking for genetic and biochemical differences in convicted psychopathic killers held in secure establishments across the UK is particularly upset as he believes he is on the brink of a major discovery. He is determined to complete his research before the money runs out despite Steven's warning about the dangers of being continually exposed to evil. His warnings go unheeded with tragic consequences.

What you don't know about the American healthcare system might kill you. From fatal malpractice to Medicare fraud, Dr. Stephen Soloway has seen it all over his thirty years practicing medicine. Now, the man known as "Dr. Trump" is ripping off the Band-Aid and exposing the truth about the American healthcare system—the good, the bad, and the rotten. Page after shocking page, you'll discover the truth about where the coronavirus came from, and if we'll ever be able to cure it. Learn the sad reality of what Medicare for All would mean for our nation. Find out why you should stay away from hospitals as if your life depended on it. (It does.) Dr. Soloway explains the medical tips and tricks that could save you from amputations, years of pain, or even death. Appointed by President Donald Trump to the President's Council on Sports, Fitness, and Nutrition, Dr. Soloway is a leader in his field, who sat on numerous boards and panels in the pharmacological industry, along with national advisory panels for major companies involved in arthritis or osteoporosis research. His uncanny ability to diagnose even the most complex cases has earned him the reputation of being a real-life Dr. House—minus the pill problem. Beyond his savvy insights into the secrets of our medical system, Dr. Soloway also shares his own rags to riches story, and how dedicated medical professionals can still succeed in this difficult environment. Ultimately, Dr. Soloway has a diagnosis for all Americans: Our healthcare system—and our country as a whole—is headed for disaster. The prescription? Read this book to find out.

In 1996, Patterson Hood recruited friends and fellow musicians in Athens, Georgia, to form his dream band: a group with no set lineup that specialized in rowdy rock and roll. The Drive-By Truckers, as they named themselves, grew into one of the best and most consequential rock bands of the twenty-first century, a great live act whose songs deliver the truth and nuance rarely bestowed on Southerners, so often reduced to stereotypes. Where the Devil Don't Stay tells the band's unlikely story not chronologically but geographically. Seeing the Truckers' albums as roadmaps through a landscape that is half-real, half-imagined, their fellow Southerner Stephen Deusner travels to the places the band's members have lived in and written about. Tracking the band from Muscle Shoals, Alabama, to Richmond, Virginia, to the author's hometown in McNairy County, Tennessee, Deusner explores the Truckers' complex relationship to the South and the issues of class, race, history, and religion that run through their music. Drawing on new interviews with past and present band members, including Jason Isbell, Where the Devil Don't Stay is more than the story of a great American band; it's a reflection on the power of music and how it can frame and shape a larger culture.

The Essex village of Earls Colne boasts one of the most comprehensive collections of historical documents in Britain, and has been the subject of an intensive and ongoing research project to collate and computerise the surviving records. As such, Earls Colne is undoubtedly one of the most studied parishes in England. Yet whilst much is now known about the village and its inhabitants, little work has been done on the social relationships that bound the community together within its mental and physical landscape. As such, scholars will welcome Dr MacKinnon's investigation into the social, political and cultural world of early modern England as represented by Earls Colne. The book provides a fresh approach to the study of the landscape of a seventeenth-century village by focussing on the relationships between political power and cultural artefacts. It examines how private, public and communal spaces within society were generated, gendered and governed, and how this was recorded and perpetuated in the records, names, and monuments of the parish and surrounding landscape. Yet whilst the 'elites' tried to represent a select social landscape through their control of the local records and documents, these attempts were always counterbalanced by the less powerful members of the community who occupied and contested these spaces. By reconstructing the dynamics of Earls Colne through a careful reading and cross-referencing of the surviving documents, buildings and place names, this

book offers a fascinating insight into how the sights and sounds of early modern society were imbued with the social relations of parish politics. As well as deepening our understanding of Earls Colne itself, the book offers historians the potential to revisit other local studies from a fresh perspective.

It is England, 2002, and Persian Gulf War veterans are getting sick and dying from a mysterious ailment. Steven Dunbar, a medical investigator, uncovers a conspiracy and threat that will kill more people.

The Tasmanian devil is threatened by Devil Facial Tumour Disease (DFTD), a transmissible form of cancer that has reduced the population by over 80%. Persecution, extreme climate events, vehicle collision and habitat destruction also put pressure on this endangered species. The recovery effort to save the Tasmanian devil commenced over 15 years ago as a collaborative initiative between the Tasmanian government, the Australian government, the Zoo and Aquarium Association Australasia, and many research institutions. Saving the Tasmanian Devil documents the journey taken by partner organisations in discovering what DFTD is, the effect it has on wild devil populations, and the outcomes achieved through research and management actions. Chapters describe all aspects of devil conservation, including the captive devil populations, applied pathology, immunology and genetic research findings, adaptive management, and the importance of advocacy and partnerships. This book will provide management practitioners and conservation scientists with insight into the complexities of undertaking a program of this scale, and will also be of value to researchers, students and others interested in conservation.

Now a major motion picture starring Ewan McGregor! From master storyteller Stephen King, his unforgettable and terrifying sequel to *The Shining*—an instant #1 New York Times bestseller that is “[a] vivid frightscape” (*The New York Times*). Years ago, the haunting of the Overlook Hotel nearly broke young Dan Torrance’s sanity, as his paranormal gift known as “the shining” opened a door straight into hell. And even though Dan is all grown up, the ghosts of the Overlook—and his father’s legacy of alcoholism and violence—kept him drifting aimlessly for most of his life. Now, Dan has finally found some order in the chaos by working in a local hospice, earning the nickname “Doctor Sleep” by secretly using his special abilities to comfort the dying and prepare them for the afterlife. But when he unexpectedly meets twelve-year-old Abra Stone—who possesses an even more powerful manifestation of the shining—the two find their lives in sudden jeopardy at the hands of the ageless and murderous nomadic tribe known as the True Knot, reigniting Dan’s own demons and summoning him to battle for this young girl’s soul and survival...

The tie-in edition of the nine-part CBS All Access series starring Whoopi Goldberg, Alexander Skarsgard, and James Marsden. When a man escapes from a biological testing facility, he sets in motion a deadly domino effect, spreading a mutated strain of the flu that will wipe out 99 percent of humanity within a few weeks. The survivors who remain are scared, bewildered, and in need of a leader. Two emerge--Mother Abigail, the benevolent 108-year-old woman who urges them to build a peaceful community in Boulder, Colorado; and Randall Flagg, the nefarious "Dark Man," who delights in chaos and violence. As the dark man and the peaceful woman gather power, the survivors will have to choose between them--and ultimately decide the fate of all humanity.

Now a Netflix film starring Tom Holland and Robert Pattinson A dark and riveting vision of 1960s America that delivers literary excitement in the highest degree. In *The Devil All the Time*, Donald Ray Pollock has written a novel that marries the twisted intensity of Oliver Stone’s *Natural Born Killers* with the religious and Gothic overtones of Flannery O’Connor at her most haunting. Set in rural southern Ohio and West Virginia, *The Devil All the Time* follows a cast of compelling and bizarre characters from the end of World War II to the 1960s. There’s Willard Russell, tormented veteran of the carnage in the South Pacific, who can’t save his beautiful wife, Charlotte, from an agonizing death by cancer no matter how much sacrificial blood he pours on his “prayer log.” There’s Carl and Sandy Henderson, a husband-and-wife team of serial killers, who troll America’s highways searching for suitable models to photograph and exterminate. There’s the spider-handling preacher Roy and his crippled virtuoso-guitar-playing sidekick, Theodore, running from the law. And caught in the middle of all this is Arvin Eugene Russell, Willard and Charlotte’s orphaned son, who grows up to be a good but also violent man in his own right. Donald Ray Pollock braids his plotlines into a taut narrative that will leave readers astonished and deeply moved. With his first novel, he proves himself a master storyteller in the grittiest and most uncompromising American grain.
