A guide to country living features photographs, illustrations, instructions and tips for living off the land, covering such topics as canning and preserving, soap-making, and building a dog house.

Drawn from and expanded on the bestselling Encyclopedia of Country Living, this is a complete manual for setting up a vegetable garden—whether it’s just a few rows of lettuce or a year-round field that produces enough for a whole family to eat. This book is informed by years of hands-on experience and the wisdom gathered from a generation of homesteaders and small farmers. Starting with planning the garden (plot size, seasonal considerations, getting the most from a small plot) and laying it out (rows, beds, plowing), this book addresses the planning and growing issues for all North American climate zones. Gardeners need to understand (and love) their soil, and the Growing Your Own Vegetables explains it in simple terms, with advice on composting and testing for contamination (so important since this is going to be your food source!). Carla Emery was a very early advocate of gardening without chemical fertilizers, so the approach here is organic all the way. The large part of the book is the crop-by-crop guide to planting, cultivating, and harvesting the delicious vegetables we love to ear: onions, leafy greens, stems and flowers (rhubarb, artichoke, broccoli), roots (spuds, radishes, jicama), grasses & grains (just imagine: your own wheat field!), legumes, gourds, and the nightshade family (that would be tomatoes, peppers, eggplant).

Recipes are combined with advice in food preservation, gardening, beekeeping, raising livestock, soap making, and other farm and household activities.

Equipped with the knowledge of when to harvest, how to harvest, and what supplies are needed to preserve your harvest, anyone can learn what it takes to create authentic, old-fashioned recipes in this age of supermarket dependence. Carla Emery’s in-depth knowledge comes from her years spent with farmers and homesteaders who truly lived off the land. Culling from and expanding on sections in the famed Encyclopedia of Country Living, co-author Lorene Forkner offers a discussion of our changing motivation as food consumers, detailed explanations of the processes behind canning and preserving, and a wealth of recipes for fruits, vegetables, meats and fish, and herbs. From drying to pickling to freezing, Emery’s preserving methods are as broad in scope as the recipes themselves. Do-it-yourselfers can welcome summer’s arrival with Chunky Peach Jam and Oven-Dried Tomatoes, or host a fall harvest with fresh Herb Bouquets and Smoked Chicken. Step-by-step instructions, illustrations, charts, and informational sidebars make the process easy and enjoyable.
