The Profiler is the first in the Munro Family series by Aussie author Chris Taylor, and I thoroughly enjoyed it. The pace is brisk, the tension high and the suspense is thick throughout the pages; I did find the sex a little heavy and overly descriptive though (which is of course my opinion) Set in Sydney with fleeting glimpses of Canberra, the authenticity was great.

the territory she has so brilliantly made her own: the small towns and flatlands of southwestern Ontario. Subtly honed with her hallmark precision, grace, and compassion, these stories illuminate the quotidian yet extraordinary particularity in the lives of men and women, parents and children, friends and lovers as they discover sex, fall in love, part, quarrel, suffer defeat, set off into the unknown, or find a way to be in the world. Peopled with characters as real to us as we are to ourselves, Munro ' s stories encompass the fullness of human experience—from the wild exhilaration of first love, in “ Passion, ” to the lengths a once-straying husband will go to make his wife happy as her memory fades, in “ The Bear Came Over the Mountain. ” Other stories suggest the punishing consequences of leaving home (“ Runaway ”) or leaving a marriage (“ The Children Stay ”). The part romantic love plays in one ' s existence

is explored in “ Too Much Happiness, ” based on the life of the noted nineteenth-century mathematician, Sophia Kovalevsky. And in stories that Munro has described as “ closer to the truth than usual ” — “ Dear Life, ” “ Working for a Living, ” and “ Home ” among them—we glimpse the author ’ s own life. As the Nobel Prize presentation speech says in part: “ Reading one of Alice Munro ’ s texts is like watching a cat walk across a laid dinner table. A brief short story can often cover decades, summarizing a life, as she moves deftly between different periods. No wonder Alice Munro is often able to say more in thirty pages than an ordinary novelist is capable of in three hundred. She is a virtuoso of the elliptical and the master of the contemporary short story. ”

harsh realities of life", it is now recognised as a site of vulnerabilities and a place where care work can go unacknowledged and be a source of social and economic hardship. This book addresses the strong relationships that exist between vulnerability and care and dependency in particular contexts, where family law and social policy have a contribution to make. A fundamental premise of this collection is that vulnerability needs to be analysed in a way that gets at the heart of the differential power relationships that exist in society, particularly in respect of access to family justice, including effective social policy and law targeted at the specific needs of families in mutually dependent caring relationships. It is therefore crucial to critically examine the various approaches taken by policy makers and law reformers in order to understand the range of ways that some families, and some family members, may be rendered

more vulnerable than others. The first book of its kind to provide an intersectional approach to this subject, *Vulnerabilities, Care and Family Law* will be of interest to students and practitioners of social policy and family law.

There is an increasing emphasis on post-qualifying training for social workers, especially in the complex and demanding area of working with children and families. This essential textbook is especially designed for practitioners studying at this level. Using case studies and activities to link research, theory and practice, *Social Work with Children and Families* takes a wider look at the role and tasks of an experienced social work practitioner, and the skills and knowledge needed to develop professionally from this point.

exploring the origins of present-day arrangements, locating English policy and practice in both a wider British and international context. It examines tragic cases such as 'Baby P' and Maria Colwell, considering their impact on public and professional attitudes and, in turn, the implications for the child protection system. Looking to the future of child protection, Nigel Parton considers the current state of the system and argues that we need to address wider social and political issues, including poverty, class and inequality. Original, authoritative and up-to-date, *The Politics of Child Protection* is an important book for all students, practitioners and researchers interested in safeguarding and child protection.

Many commentators tell us that, in today's world, everyday life has become selfish and atomised—that individuals live only to consume. But are they wrong? In *Me, Me, Me*, Jon Lawrence re-tells the story of England since the Second World War through the eyes of ordinary people—including his own parents—to argue that, in fact, friendship, family, and place all remain central to our daily lives, and whilst community has changed, it is far from dead. He shows how, in the years after the Second World War, people came increasingly to question custom and tradition as the pressure to conform to societal standards became intolerable. And as soon as they could, millions escaped the closed, face-to-face communities of Victorian Britain, where everyone knew your business. But this was not a rejection of community per se, but an attempt to find another,

new way of living which was better suited to the modern world. Community has become personal and voluntary, based on genuine affection rather than proximity or need. We have never been better connected or able to sustain the relationships that matter to us. Me, Me, Me makes that case that it's time we valued and nurtured these new groups, rather than lamenting the loss of more 'real' forms of community—it is all too easy to hold on to a nostalgic view of the past.
