In The Spontaneous Healing of Belief, you will discover paradigm-shattering revelations that demonstrate why: We are not limited by the laws of physics as we know them today! We are not limited by the laws of biology as we know them today! Our DNA is a code that we can change and "upgrade" by choice!

Braden explores the miracles that open the door to a powerful new way of seeing the world, and the science that tells why miracles are possible.

Did you know that we are born with the power to choose what's real in our world?What would it mean to discover that everything from the DNA of life to the future of our world is based upon a simple 'Reality Code' that may be changed and upgraded by choice? Revolutionary discoveries in the power of belief suggest that we're about to find out!For more than 20 years, Gregg Braden, a former senior aerospace computer systems designer, has searched for this understanding. He illustrates how the secret of spontaneously healing our false beliefs was left in the coded language of our most cherished traditions. Join Gregg as he shares the power of this mystery in our lives and invites us to the spontaneous healing of our own beliefs.

What would it mean to discover that everything from the DNA of life, to the future of our world, is based upon a simple Reality Code—one that we can change and upgrade by choice? New revelations in physics and biology suggest that we ' re about to find out! A growing body of scientific evidence suggests that our universe works like a Consciousness Computer. Rather than the number codes of typical software, our Consciousness Computer uses a language that we all have, yet are only beginning to understand. Life ' s reality code is based in the language of human emotion and focused belief. Knowing that belief is our reality-maker, the way we think of ourselves and our world is now more important than ever! For us to change the beliefs that have led to war, disease, and the failed careers and relationships of our past we need a reason to see things differently. Our ancestors used miracles to change what they believed. Today we use science. The Spontaneous Healing of Belief offers us both: the miracles that open the door to a powerful new way of seeing the world, and the science that tells us why the miracles are possible, revealing: why we are not limited by the "laws" of physics and biology as we know them today. Once we become aware of the paradigm-shattering discoveries and true-life miracles, we must think of ourselves differently. And that difference is where the spontaneous healing of belief begins.

Braden explores the miracles that open the door to a powerful new way of seeing the world, and the science that tells why miracles are possible.

The body can heal itself. Spontaneous healing is not a miracle but a fact of biology—the result of the natural healing system that each one of us is born with. Drawing on fascinating case histories as well as medical techniques from around the world, Dr. Andrew Weil shows how spontaneous healing has worked to resolve life-threatening diseases, severe trauma, and chronic pain. Weil then outlines an eight-week program in which you'll discover: - The truth about spontaneous healing and how it interacts with the mind - The foods, vitamins, supplements, and tonic herbs that will help you enhance your innate healing powers - Advice on how to avoid environmental toxins and reduce stress - The strengths and weaknesses of conventional and alternative treatments - Natural methods to ameliorate common kinds of illnesses And much more!

When it comes to disease, who beats the odds — and why? When it comes to spontaneous healing, skepticism abounds. Doctors are taught that " miraculous " recoveries are flukes, and as a result they don ' t study those cases or take them into account when treating patients. Enter Dr. Jeff Rediger, who has spent over 15 years studying spontaneous healing, pioneering the use of scientific tools to investigate recoveries from incurable illnesses. Dr. Rediger ' s research has taken him from America ' s top hospitals to healing centers around the world—and along the way he ' s uncovered insights into why some people beat the odds. In Cured, Dr. Rediger digs down to the root causes of illness, showing how to create an environment that sets the stage for healing. He reveals the patterns behind healing and lays out the physical and mental principles associated with recovery: first, we need to physically heal our diet and our immune systems. Next, we need to mentally heal our stress response and our identities. Through rigorous research, Dr. Rediger shows that much of our physical reality is created in our minds. Our perception changes our experience, even to the point of changing our physical bodies—and thus the healing of our identity may be our greatest tool to recovery. Ultimately, miracles only contradict what we know of nature at this point in time. Cured leads the way in explaining the science behind these miracles, and provides a first-of-its-kind guidebook to both healing and preventing disease.

"What would it mean to discover we're designed to live extraordinary lives of self-healing, longevity, and deep intuition? Is it possible that the advanced awareness achieved by monks, nuns, and mystics—considered rare in the past—is actually meant to be a normal part of our daily lives? In this revelatory book, now available for the first time in paperback, five-time New York Times best-selling author and 2018 Templeton Award nominee Gregg Braden explains that we no longer need to ask these questions as "What if?" Recent discoveries ranging from human evolution and genetics to the new science of neuro-cardiology (the bridge between the brain and the heart) have overturned 150 years of thinking when it comes to the way we think of ourselves, our origin, and our capabilities. In this reader-friendly journey of discovery, Braden begins with the fact that we exist as we do, even more empowered, and more connected with ourselves and the world than scientists have believed in the past. It's this indisputable fact that leads to even deeper mysteries. "How do we awaken the extraordinary abilities that come from such an awesome connection?" "What role does our ancient and mysterious heritage play in our lives today?" Join Gregg as he crosses the traditional boundaries of science and spirituality to answer precisely these questions. In doing so he reveals a) specific tools, techniques, and practices to awaken our deep intuition on-demand, for self healing and longevity; and 2) concrete solutions to the social issues that are destroying our families and dividing us as people, including the bullying of young people, hate crimes, the growing epidemic of suicide, religious extremism, and more!"-

Reveals common themes in today's most hotly debated issues, explaining how disparate opinions stem from false assumptions and how major conflicts can be resolved by making the most recent scientific discoveries available to all.

In his latest book, former senior computer systems designer and bestselling author Gregg Braden merges these ancient and modern world views into a powerful new model of time. Marrying the modern laws of fractal patterns to the ancient concept of cycles, he demonstrates how everything from the war and peace between nations to our most joyous relationships and personal crises are the returning patterns of our past. As each pattern returns, it carries the same conditions of previous cycles—fractal patterns that can be known, measured and predicted! What makes this model so important today is that the returning cycles also carry a window of opportunity—a choice point—that allows us to choose a new outcome for the cycle. Braden suggests that if we can see time from this perspective, the patterns will show us what ' s in store for the future, and perhaps how to avoid the mistakes of our past. After presenting the case histories that confirm the accuracy of fractal time calculations, the author crosses the traditional boundaries of science and spirituality to answer the question that must be asked: What does fractal time tell us about 2012, and beyond? Because the cycles repeat, the seed for 2012 has already happened and the pattern already exists! In a narrative format of easy-to-read science and true-life accounts, Fractal Time shows us what we can expect as we close the Great World Age described by the Mayan Calendar, and the secret to our moment in history.

We've all heard stories of people who've experienced seemingly miraculous recoveries from illness, but can the same thing happen for our world? According to pioneering biologist Bruce H. Lipton, it's not only possible, it's already occurring. In Spontaneous Evolution, this world-renowned expert in the emerging science of epigenetics reveals how our changing understanding of biology will help us navigate this turbulent period in our planet's history and how each of us can participate in this global shift. In collaboration with political philosopher Steve Bhaerman, Dr. Lipton invites readers to reconsider: the "unquestionable" pillars of biology, including random evolution, survival of the fittest, and the role of DNA; the relationship between mind and matter; how our beliefs about nature and human nature shape our politics, culture, and individual lives; and how each of us can become planetary "stem cells" supporting the health and growth of our world. By questioning the old beliefs that got us to where we are today and keep us stuck in the status quo, we can trigger the spontaneous evolution of our species that will usher in a brighter future.
