Joseph McMoneagle is an extraordinary remote viewer, a "psychic spy," whose experiences have given him a special insight into the nature of time and human perception. For more than seventeen years, he was a researcher and remote viewer for the top-secret Army project STARGATE. For years after that, he journeyed through time while working in a consciousness-development lab with out-of-body experience pioneer Robert A. Monroe. McMoneagle explores the questions that philosophers have for centuries debated: Does time really exist? Do our actions today really affect our future? Can we change the past? Do we slip between alternate realities? In *The Ultimate Time Machine*, McMoneagle delivers new insights into these mysteries, including: First-hand information--including transcripts from lab sessions--on the origins of humanity, the crucifixion of Jesus Christ, and the building of the Egyptian pyramids. Provocative suggestions about the nature of time, creation, and a constantly changing past. A detailed picture of our immediate future through the year 2075. More than 150 very explicit predictions on world population, aging, religious fragmentation, lifestyle changes, technological developments, and dozens of major changes to laws, customs and practices--all within a positive and constructive framework. A vision of the year 3000, comprising a test of what the author calls the "Verne Effect"--our ability to create and manipulate our future.

in this latest addition to the "Time Machine" Lyons Press baseball series, *The Ultimate Chicago Cubs Time Machine* presents a timeline format that not only includes the Cubs' greatest moments--including the latest World Series appearance and individual achievements--but would focus also on some very unusual seasons and events, such as. There are dozens of impressive, wild, wacky and wonderful stories over the years regarding Cubs history and Gitlin is the perfect person to write it with his trademark humor and thorough knowledge of Cubs lore.

From their ignominious 40-120 debut in 1962, to the "Miracle Mets" of the shocking 1969 season, to the teams of Darryl Strawberry, David Wright, and Jacob deGrom, the New York Mets have in nearly sixty years become the city's other beloved baseball franchise, with its fan base stretching well beyond the New York suburbs. The Mets' rich history is told in over two dozen engaging chapters celebrating the highlights, as well as the low lights, of baseball's most lovable team--win or lose.

Learn remote viewing secrets from Joe McMoneagle, a spy in a U.S. government military intelligence program of Stargate.

H.G. Wells, the author, has been called the father of science fiction. "The Time Machine" is one of his most notable science fictions. It's a Time Traveller's journey into the future. He explains that there are really four dimensions, three of which we call the three planes of the Space, and a fourth, Time. Also, there is no difference between Time and any of the three dimensions of Space except that our consciousness moves along it. The book narrates how the Time Traveller plans for a machine to travel through time and disappear. Comparison between the present time and future time. Like as, the air is free from gnats, the earth from weeds or fungi; everywhere were fruits and sweet and delightful flowers; brilliant butterflies fly hither and thither. The ideal of preventive medicine is attained. Diseases are stamped out. No contagious diseases. Even social triumphs too is effected. Like as, the mankind is housed in splendid shelters, gloriously clothed, and as yet are not engaged in toil. No signs of struggle, neither social nor economical. The population is also ceased to increase. No one can predict anything about the future Time. This book seems very interesting, in this way. Solves many queries raised by the various characters in the book with the Time Traveller. The author has written his best to enthrall the readers. Many future films and Television Series are made on "The Time Machine", which has in turn inspired to write new books on the topic of "The Time Machine".

The Ultimate Boston Red Sox Time Machine presents a timeline format that not only includes the Red Sox's greatest moments—including its nine World Series wins and individual achievements—but focuses also on some very unusual seasons and events, such as the refusal of the New York Yankees to go up against them in the 1904 World Series, the derivation of its name, and of course the famous Curse of the Bambino. There are dozens of impressive, wild, wacky and wonderful stories over the years regarding Red Sox history and Gitlin is the perfect person to write it with his trademark humor and thorough knowledge of Red Sox lore.

As the anchor titles in a new "Time Machine" Lyons Press baseball series, The Ultimate Cleveland Indians Time Machine presents a timeline format that not only includes the Indians' greatest moments—including World Series appearances and individual achievements—but would focus also on some very unusual seasons and events, such as the team's 20-134 season of 1899 (the absolute worst in baseball history), the "Crybabies" of 1940 (who received this nickname after complaining about their manager to such an extent that fans even turned on them), or the infamous "Ten Cent Beer Night of 1974" (when thousands of drunken fans stormed the field and forced the team to forfeit). Of course there are other events to recall, like 17-year-old Bob Feller making his debut and striking out 17 batters in 1936, or Albert Belle famously pointing at his muscle after a playoff opponent claimed (rightly) that he had corked his bat and one of his teammates sneaked into the umpire's room to steal it back so the umps could not find out that it was corked. There are dozens of impressive, wild, wacky and wonderful stories over the years regarding Indians history and Gitlin is the perfect person to write it with his trademark humor and thorough knowledge of Indians lore.

"Beautifully written, eloquently reasoned—Mr. Buonomano takes us off and running on an edifying scientific journey." —Carol Tavris, Wall Street Journal In Your Brain Is a Time Machine, leading neuroscientist Dean Buonomano embarks on an "immensely engaging" exploration of how time works inside the brain (Barbara Kiser, Nature). The human brain, he argues, is a complex system that not only tells time, but creates it; it constructs our sense of chronological movement and enables "mental time travel"—simulations of future and past events. These functions are essential not only to our daily lives but to the evolution of the human race: without the ability to anticipate the future, mankind would never have crafted tools or invented agriculture. This virtuosic work of popular science will lead you to a revelation as strange as it is true: your brain is, at its core, a time machine.

"A first-person look at the U.S. Army's Stargate Project--a top-secret, intelligence-gathering initiative launched at the height of the Cold War--from the Army's Remote Viewer 001. McMoneagle recounts his distinguished military career as well as his work with scientists who tested his abilities in the lab"--Provided by publisher.

The Remarkable Life of U.S. Government Remote Viewer 001 Joseph McMoneagle is now known as the best Operational Remote Viewer in the history of the U.S. Army's Special Project-Stargate. His intelligence collection results have never been surpassed and rarely equaled. Among his achievements: He described the interior of a top-secret Soviet manufacturing plant and accurately predicted a new class of submarine under construction there. He sketched the location and described the thoughts of a kidnapped U.S. Army General being held by the Red Brigade in Northern Italy. Nearly a year in advance he accurately predicted when Skylab would leave orbit and where it would impact on the Earth's surface. After conventional reconnaissance failed, he and others were able to locate a downed Soviet bomber that had been carrying nuclear materials. He achieved these results using scientifically designed and tested double-blind protocols. And in the years since his retirement he has continued to demonstrate these abilities on camera for national television in three countries, in the lab at the famed Monroe Institute, and for private companies. Are his abilities a natural gift, or taught? Was it his largely unsuspected psychic ability that helped keep him alive in Vietnam, and aided in his invaluable contributions to the cold war effort, that made McMoneagle a first-class remote viewer? How much did he owe to his near-death experience in the 1970s? And why would he give up a safe and distinguished career as an advisor to the Commanding General of the U.S. Army Intelligence and Security Command to become Remote Viewer 001? This is his story."
