Mitch Kowalski has translated his considerable understanding of tomorrows legal profession into an original, provocative and entertaining narrative. Professor Richard Susskind, author of *The End of Lawyers?* This is the most innovative law practice management book Ive ever seen. Mitch has deftly combined an engaging novel about the lives of working lawyers with an illuminating treatise on how law firms must respond to extraordinary change in the legal marketplace. *Avoiding Extinction* is as entertaining as it is instructive -- and it couldnt be more timely. Susskind, Practice Management Advisor, lawyer and writer on law practice management and technology. Creator of the law blog, Thoughtful Legal Management.

This book predicts the decline of today's professions and describes the people and systems that will replace them. In an Internet society, according to Richard Susskind and Daniel Susskind, we will neither need nor want doctors, teachers, accountants, architects, the clergy, consultants, lawyers, and many others, to work as they did in the 20th century. The Future of the Professions explains how 'increasingly capable systems' - from telepresence to artificial intelligence - will bring fundamental change in the way that the 'practical expertise' of specialists is made available in society. The authors challenge the 'grand bargain' - the arrangement that grants various monopolies to today's professionals. They argue that our current professions are antiquated, opaque and no longer affordable, and that the expertise of the best is enjoyed only by a few. In their place, they propose six new models for producing and distributing expertise in society. The book raises important practical and moral questions. In an era when machines can out-perform human beings at most tasks, what are the prospects for employment, who should own and control online expertise, and what tasks should be reserved exclusively for people? Based on the authors' in-depth research of more than ten professions, and illustrated by numerous examples from each, this is the first book to assess and question the relevance of the professions in the 21st century.
