Decorate your desk, home, wedding or next get-together with these professional looking paper blossoms! This stunning book presents detailed instructions for eleven elegant and lifelike paper flower projects that will enhance any home or occasion. Paper flower expert Naomiki Sato starts by showing you how to fold seven types of paper roses using a variety of techniques for four- and five-sided blossoms, along with their stems, thorns and leaves, and how to assemble them. Four equally exciting papercraft projects follow, showing you how to make Japanese Cherry Blossoms, Bellflowers, tropical Plumeria (Frangipani) and Bougainvillea. Each of the eleven projects has detailed step-by-step photographs, diagrams and instructions that make these sophisticated-looking blossoms easy to make even for beginning origami folders. The book includes basic guides to paper and tools, as well as an introduction to basic origami folding techniques for novices.

Wealthy Lanna Davenport has the perfect life-and she hates it. When faced with the choice between the kind and caring man her mother has picked for her and the one who can help her escape the confines of her life, Lanna finds herself torn between being herself and letting everything go.

How should we design our economic systems? Should we tax the rich at a higher rate than the poor? Should we have a minimum wage? Should the state provide healthcare for all? These and many related questions are the subject of distributive justice, and different theories of distributive justice provide different ways to think about and answer such questions. This book provides a thorough introduction to the main theories of distributive justice and reveals the underlying sources of our disagreements about economic policy. It argues that the universe of theories of distributive justice is surprisingly simple, yet complicated. It is simple in that the main theories of distributive justice are just four in number, and in that these theories each offer a distinct, well-defined theoretical approach to distributive justice; yet it is complicated in that the main theories disagree at several distinct, fundamental levels, and in that it is possible to spin innumerable new theories from the elements of the four main theories. Key Features: Covers the four major theories of distributive justice and their leading philosophers, elucidating the attractions and drawbacks of each: Friedrich A. von Hayek and right-liberalism; John Rawls and left-liberalism; Robert Nozick and libertarianism; Gerald A. Cohen and socialism. Explains why these four theories have come to dominate most philosophical discussions on distributive justice, highlighting the essential answer provided in each that is lacking in other theories. Written for any reader interested in the topic, with an annotated reading list at the end of each chapter and helpful glossary at the back of the book.

This work offers a compendium of annotations of first-party extra-contractual damage cases, focusing on cases which deal with the insurers duty to act in good faith towards its insureds and the recovery of damages for insured for the insurer's failure to do so. It includes relevant statutes and regulations from the 51 jurisdictions.
