INTRODUCTION 1.1 BACKGROUND The Department of Public Works & Transportation, hereinafter "DPW&T", Transportation Division, is a service organization established to provide a professional fleet management program in support of the missions of County departments.

TRANSPORTATION POLICIES & PROCEDURES MANUAL

Lincoln MKZ Hybrid Fuel Efficiency Debacle. Ford is returning cash to some 200,000 customers, including the MKZ Lincoln Hybrid owners and lessees, in the wake of a fuel efficiency debacle that has led to the car maker cutting the fuel economy ratings on a number of its hybrids.

Complete with headnotes, summaries of decisions, statements of cases, points and authorities of counsel, annotations, tables, and parallel references.

The EU Commission has set the goal of facilitating a competitive transport system, increasing mobility and supporting growth while simultaneously reaching a target of 60 per cent emissions reductions by 2050. In light of past performance and estimated development, the target will not be reached without further behavioural change in the transport sector. This interdisciplinary book examines how such a behavioural shift can be achieved by various organizational and legal means, focusing primarily on the European Union and its specific policies related to greening transport.

Considers legislation to authorize overseas air cargo transportation licenses for steamship operators and to establish the All-American Flag Line, Inc., for consolidation of Government air cargo transportation.

This Round Table presents arguments for and against subsidising public transport and underlines the need for careful monitoring.

The Commission on Accreditation of Medical Transport Systems (CAMTS) has been accrediting air and ground transport services since 1991. One of the most significant needs the Commission has recognized is to assist transport services in creating a culture that supports safety and quality for both crews and patients. Most of the helicopter EMS (emergency medical service) accidents and many ground ambulance accidents can be attributed to human factors and systems designs that lead to poor decision-making. Management commitment is vital to create and maintain a culture that supports risk assessment, accountability, professionalism and organizational dynamics. This reference book has been created by CAMTS to address this need directly and comprehensively. It offers a groundbreaking collection of expert insights and practical solutions that can be used by EMS, Fire and Rescue, public and private services, and professional emergency and transport professionals worldwide. Quoting from the foreword written by the late Robert L. Helmreich, Professor Emeritus of Psychology at The University of Texas Human Factors Research Project, 'This is an important book which should be required reading for everyone involved in patient transport, from managers and dispatchers to those at the sharp end... The experienced and able authors and editors of this work use culture as the overarching concept needed to maximize safety while delivering patients expeditiously.'
