An experiment in social isolation turns into a journey of self-discovery as a photojournalist commits to chronicle 60 days in New York city without talking to a single person. More than just an exercise in observation and self-control, he's hoping to forget a troubled past and mend a broken heart. But the city has a sneaky way of throwing the best laid plans and noble efforts to waste revealing secrets that lie right in front of him. All he has to do is open his eyes ... A touching, vividly illustrated journey through contemporary modern New York, exploring what it takes to find yourself- and maybe your soulmate - in the middle of a crowded, bustling modern world.

When the last vestiges of his childhood are taken from him, Zerocalcare discovers unsuspected secrets about his family. Torn between the soothing numbness of the innocence of youth and the impossibility to elude society's ever expanding control over people's lives, he'll have to understand where he really comes from, before he understands where he is going.

Naples and Napoleon rewrites the history of Italy in the age of the European revolutions from the perspective of the South. In contrast to later images of southern backwardness and immobility, Davis portrays the South as a precocious theatre for political and economic upheavals that sooner or later would challenge the survival of all the pre-Unification states. Focusing on the years of French rule from 1806 to 1815, when southern Italy became the arena for one of the most ambitious reform projects in Napoleonic Europe, Davis argues that this owed less to Napoleon than to the forces unleashed by the crisis of the Ancien Regime. However, an examination of the earlier Republic and the popular counter-revolutions of 1799, along with the later revolutions in Naples and Sicily in 1820-1, reveals that the impact of these changes was deeply contradictory. This major reinterpretation of the history of the South before Unification significantly reshapes our understanding of how the Italian states came to be unified, while Davis also shows why long after Unification not just the South but Italy as a whole would remain vulnerable to the continuing challenges of the new age

How did ideas about crime and criminals change in Europe from around 1750 to 1940? How did European states respond to these changes with the development of police and penal institutions? Clive Emsley addresses these questions using recent research on the history of crime and criminal justice in Europe. He reveals that many of the ideas hailed as new in current debate on crime and its 'solutions', have a very long and illustrious history.

The fan-favorite Scrooge McDuck life story as it's never been told before -- in chronological order!

The “Legnano” Infantry Division is considered as the first nucleus of the co-belligerent Italian Army since it was charged with constituting the “First Motorized Group” which made its combat debut at Montelungo on 8 December 1943. Five months later, this small formation was expanded, becoming the “Italian Liberation Corps”. Beginning in September 1944 six Italian Combat Groups, equipped with Allied weapons and materiel, were established. The “Legnano” Combat Group, heir of the “Legnano” Division, was given the responsibility of the Idice Valley sector on 23 March 1945. Commanded by General Umberto Utili, the Group participated to the liberation of Bologna and was also involved in other fights before the end of the war in Italy, the last of which took place in Val Sabbia on 2 May 1945.
