Dead cats. That's the image many people conjure up when you mention curiosity. An image perpetuated by a dusty old proverb that has long represented the extent of our understanding of the term. This book might not put the proverb to rest, but it will flip it upside down: far from killing anything, curiosity breathes new life into almost everything it touches. In *Curious?* Dr. Todd Kashdan offers a profound new message missing from so many books on happiness: the greatest opportunities for joy, purpose, and personal growth don't, in fact, happen when we're searching for happiness. They happen when we are mindful, when we explore what's novel, and when we live in the moment and embrace uncertainty. Positive events last longer and we can extract more pleasure and meaning from them when we are open to new experiences and relish the unknown. Dr. Kashdan uses science, story, and practical exercises to show you how to become what he calls a curious explorer—a person who's comfortable with risk and challenge and who functions optimally in an unstable, unpredictable world. Here's a blueprint for building lasting, meaningful relationships, improving health, increasing creativity, and boosting productivity. Aren't you curious to know more?

"Having been born a freeman, and for more than thirty years enjoyed the blessings of liberty in a free State—and having at the end of that time been kidnapped and sold into Slavery, where I remained, until happily rescued in the month of January, 1853, after a bondage of twelve years—it has been suggested that an account of my life and fortunes would not be uninteresting to

the public." -an excerpt

While the nation was celebrating Independence from British Rule and singing all praises for the ' Father of The Nation ' – Mahatma Gandhi, the news of his assassination came as a shock. He was shot in the chest three times while he was walking towards the prayer grounds at the Birla House, New Delhi. The man behind the assassination – Nathuram Godse was a well known nationalist. He was arrested at the crime scene and sentenced to death after a year long trial. The book contains the final speech given by Godse in the court, mentioning the reason behind the drastic step he took.

A valuable presentation of theoretical and practical information in the area of liquid-solid filtration. The development of theoretical models is highlighted with practical design data and problem-related examples. Modern trends, e.g., membrane systems, are reported together with the fundamental aspects of particulate technology. The increasing interest in pollution control and environmental protection provides an expansive market for this book. Chemical engineers, chemists, physicists, water treatment/sewage engineers, civil engineers and all those concerned with filtration and pollution will find this book of tremendous value and practical use.

This book has nine sections each dealing with a general election held between 1970-2008. Each section is divided further into four sub-sections: background, monograph, summary, statistics.

This book brings into focus the innovative methods of

learning in many Indian schools. It sheds light on schools that make the learning process fun for the teacher as well as the taught, in contrast to the whirl of examination-oriented learning in mainstream schools. The researched data on alternative schools in the country offer the reader an array of institutions all over the country, where efforts are being made to move away from traditional and mainstream learning. It includes exclusive articles by leading practitioners in the field, who offer an insight into the ground reality when a certain philosophy is applied to a school, and also experiential accounts of how such alternative practices mould the learner, teacher and impact the parent as well. The book also consists of a directory of alternative schools in India, including many schools that are tucked away in remote corners of the country. Interestingly, the common thread binding these ‘ alternative schools ’ is concern for the welfare of the child by teachers who see their work as much more than a job.

This volume brings into focus a range of emergent issues related to women in the Indian diaspora. The conditions propelling women ’ s migration and their experiences during the process of migration and settlement have always been different and very specific to them. Standing ‘ in-between ’ the two worlds of origin and adoption, women tend to experience dialectic tensions between freedom and subjugation, but they often use this space to assert independence, and to redefine their roles and perceptions of self. The central idea in this volume is to understand women ’ s agency in addressing and redressing the complex issues faced by them; in restructuring the cultural formats of patriarchy

and gender relations; managing the emerging conflicts over what is to be transmitted to the following generations; renegotiating their domestic roles and embracing new professional and educational successes; and adjusting to the institutional structures of the host state. The essays included in the volume discuss women in the Indian diaspora from multidisciplinary perspectives involving social, economic, cultural, and political aspects. Such an effort privileges diasporic women ' s experiences and perspectives in the academia and among policy makers.

This volume offers a new understanding of caste in contemporary India. It argues that the traditional view of caste - as a single hierarchy, with Brahmans at the top and the untouchable castes at the bottom - is no longer valid. Based on fieldwork, the articles in this volume prove that ritual dominance does not determine the nature of caste interactions in any way. From politics to gender to economic interaction, the single, pure hierarchy is constantly being questioned and weakened. Castes that once had the status of shudras are now claiming, on occasions, a position superior to Brahmans and Kshatriyas; agrarian castes - such as Jats, Ahirs and Gujars - are at the political forefront, taking caste identities outside the village; the once passive untouchable castes are now aggressive and militant, and aware of their rights in a democratic society. This exciting collection of original articles demonstrates how caste identity today challenges the outdated notion of a single, all-encompassing hierarchy, within which each caste co-exists peacefully.
