This book gathers the refereed proceedings of the 1st International Congress on Blockchain and Applications 2019, BLOCKCHAIN'19, held in \u00c1vila, Spain, in June 2019. Among the scientific community, blockchain and artificial intelligence are broadly considered to offer a promising combination that could transform the production and manufacturing industry, media, finance, insurance, e-government, etc. Nevertheless, there is no generally accepted approach, nor established best practices, for combining blockchain and artificial intelligence. The 21 papers presented here were carefully reviewed and selected from over 40 submissions. They highlight the latest advances in blockchain, artificial intelligence and their application domains, exploring innovative ideas, guidelines, theories, models, technologies, and tools, and identifying critical issues and challenges that researchers and practitioners will face in the near future. We wish to thank the sponsors: IEEE Systems Man and Cybernetics Society, Spain Section Chapter, and the IEEE Spain Section (Technical Co-Sponsor), IBM, Indra, Viewnext, Global Exchange, AEPIA, APPIA and AIR institute.

Why should I do business with you and not your competitor? Whether you are a retailer, manufacturer, distributor, or service provider - if you cannot answer this question, you are surely losing customers, clients and market share. This eye-opening book reveals how identifying your competitive advantages and trumpeting them to the marketplace is the most surefire way to close deals, retain clients, and stay miles ahead of the competition. The five fatal flaws of most companies: ? They don't have a competitive advantage but think they do ? They have a competitive advantage but don't know what it is/so they lower prices instead ? They know what their competitive advantage is but neglect to tell clients about it ? They mistake strengths for competitive advantages ? They don't concentrate on competitive advantages when making strategic and operational decisions The good news is that you can overcome these costly mistakes - by identifying your competitive advantages and creating new ones. Consultant, public speaker, and competitive advantage expert Jaynie Smith will show you how scores of small and large companies substantially increased their sales by focusing on their competitive advantages. When advising a CEO frustrated by his salespeople's inability to close deals, Smith discovered that his company stayed on schedule 95 percent of the time - an achievement no one else in his industry could claim. By touting this and other competitive advantages to customers, closing rates increased by 30 percent and so did company revenues. Jack Welch has said, "[If you don't have a competitive advantage, don't compete.]" This straight-to-the-point book is filled with insightful stories and specific steps on how to pinpoint your competitive advantages, develop new ones, and get the message out about them. The biggest marketing flaw in most companies is their failure to fully reap the benefits of their competitive advantages. Either they think they have a competitive advantage but don't. Or they have one and don't realize it. Or they know they have a strong competitive advantage but fail to promote it adequately to their customers and prospects. In my research with middle-market companies, I found only two CEOs out of 1,000 who could clearly name their companies' competitive advantages. The other 99.8 percent could offer only vague, imprecise generalities. These same CEOs often rely on outside consultants to guide strategic-planning sessions. Yet, in my experience, very few consultants - even seasoned ones - give competitive advantage evaluation more than a superficial glance. Ignoring your competitive advantages can be an expensive and even fatal mistake. Because no matter the size of your company or the kind of business you are in, your competitive advantages should be the foundation of all your strategic and operational decisions. They're the reasons customers choose to buy from you instead of the other guy. From Creating Competitive Advantage

This book is intended for the practicing surgeon. It is designed to offer practical insights into the essentials of an epidemiological, statistical and outcomes-based approach to surgical practice. Surgeons are invited to begin to develop the requisite skills that will allow them to communicate effectively with their colleagues in epidemiology and

Whether you're a veteran or an absolute noob, this is the best place to start with Kali Linux, the security professional's platform of choice, and a truly industrial-grade, and world-class operating system distribution-mature, secure, and enterprise-ready.
