Suspension is probably the most misunderstood aspect of motorcycle performance. This book, by America's premier suspension specialist, makes the art and science of suspension tuning accessible to professional and backyard motorcycle mechanics alike. Based on Paul Thede's wildly popular Race Tech Suspension Seminars, this step-by-step guide shows anyone how to make their bike, or their kid's, handle like a pro's. Thede gives a clear account of the three forces of suspension that you must understand to make accurate assessments of your suspension's condition. He outlines testing procedures that will help you gauge how well you're improving your suspension, along with your riding. And, if you're inclined to perfect your bike's handling, he even explains the black art of chassis geometry. Finally, step-by-step photos of suspension disassembly and assembly help you rebuild your forks and shocks for optimum performance. The book even provides detailed troubleshooting guides for dirt, street, and supermoto--promising a solution to virtually any handling problem.

An updated version of the most acclaimed bike repair guide, Barnett's Manual takes the mystery out of every procedure, emphasizing detail, logic, and measurement to make repairs with speed and efficiency and eliminate guesswork. Arranged according to the way mechanics actually need information, the manual functions as both a stand-alone resource and an important training tool for professionals and amateurs. This new edition includes extensive reference information, more than 1,000 illustrations, and worksheets. Each volume features grease-resistant perforated pages that can snap easily into a three-ring binder.
