The laboratory companion to Introduction to the Biology of Marine Life by James L. Sumich and John F. Morrissey, this laboratory manual further engages students in the excitement and challenges of understanding marine organisms and the environments in which they live. Students will benefit from a more thorough examination of the topics introduced in the text and lecture through observation and critical thinking activities in the Laboratory and Field Investigations in Marine Life. Also, the lab manual includes suggested topics for additional investigation, which provides flexibility for both instructors and for students to explore further various topics of interest. The only lab manual of its kind, Laboratory and Field Investigations in Marine Life is the ideal complement to any marine biology teaching and learning package!

"The American Meteorological Society Education Program"--T.p. verso.

From the Preface: This manual, Child Protective Services: A Guide for Caseworkers, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based-including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

Fish kills are graphic evidence of serious problems in a lake or stream. If the kill is related to the presence of toxic chemicals, there may be human health concerns, in addition to the obvious damage to the ecosystem and the fisheries resources. Depending on the cause of a fish kill, legal and economic ramifications may be involved. If the kill is caused by human or corporate actions, litigation is likely to follow, with possible court-awarded damages and assessed costs for cleanup and restoration. This manual is intended to help fisheries biologists and others to prepare for a fish kill investigation.

Contents: (1) Results of the Invest.; (2) SEC Review of 2000 and 2001 Markopolos Complaints; (3) SEC 2004 OCIE Cause Exam. of Madoff; (4) SEC 2005 NERO Exam. of Madoff; (5) SEC 2006 Invest. of Markopolos Complaint; (6) Effect of Madoff's Stature and Reputation on SEC Exam.; (7) Allegations of Conflict of Interest from the Relationship between Eric Swanson and Shana Madoff; (8) Private Entities's Due Diligence Efforts Revealed Suspicious Activity about Madoff's Operations; (9) Potential Investors Relied upon the Fact That the SEC had Examined and Investigated Madoff in Making Decisions to Invest with Him; (10) Additional Complaints Received by the SEC re: Madoff; (11) Additional Exam. and Inspect. of Madoff's Firms by the SEC.

The MSC adopted a new Code of International Standards and Recommended Practices for a Safety Investigation into a Marine Casualty or Marine Incident (Casualty Investigation Code). Relevant amendments to SOLAS Chapter XI 1 were also adopted, to make parts I and II of the Code mandatory. Part III of the Code contains related guidance and explanatory material. The Code will require a marine safety investigation to be conducted into every marine casualty involving the total loss of the ship or a death or severe damage to the environment. The Code will also recommend an investigation into other marine casualties and incidents, by the flag state of a ship involved, if it is considered likely that it would provide information that could be used to prevent future accidents. The new regulations expand on SOLAS Regulation 1/21, which requires administrations to conduct an investigation of any casualty occurring to any of its ships when it judges that such an investigation may assist in determining what changes in the present regulations might be desirable.
