This is the unauthorized, uncensored and unbelievable true story behind the making of a pop culture phenomenon. The original Star Trek series debuted in 1966 and has spawned five TV series spin-offs and a dozen feature films, with an upcoming one from Paramount arriving in 2016. The Fifty-Year Mission is a no-holds-barred oral history of five decades of Star Trek, told by the people who were there. Hear from the hundreds of television and film executives, programmers, writers, creators and cast as they unveil the oftentimes shocking story of Star Trek's ongoing fifty-year mission -a mission that has spanned from the classic series to the animated show, the many attempts at a relaunch through the beloved feature films. Make no mistake, this isn't just a book for Star Trek fans. Here is a volume for all fans of pop culture and anyone interested in the nuts and bolts of a television touchstone.

What is fanfiction, and what is it not? Why does fanfiction matter? And what makes it so important to the future of literature? Fic is a groundbreaking exploration of the history and culture of fan writing and what it means for the way we think about reading, writing, and authorship. It's a story about literature, community, and technology—about what stories are being told, who's telling them, how, and why. With provocative discussions from both professional and fan writers, on subjects from Star Trek to The X-Files and Buffy the Vampire Slayer to Harry Potter, Twilight, and beyond, Fic sheds light on the widely misunderstood world(s) of fanfiction—not only how fanfiction is transforming the literary landscape, but how it already has. Fic features a foreword by Lev Grossman (author of The Magicians) and interviews with Jonathan Lethem, Doug Wright, Eurydice (Vivean Dean), and Katie Forsythe/wordstrings. When a Mapuche chief suddenly goes missing, a British naturalist is asked to find him in the vast Argentine pampas Clarke, a nineteenth-century English naturalist, roams the pampas in search of that most elusive and rare animal: the Legibrerian hare, whose defining quality seems to be its ability to fly. The local Indians, pointing skyward, report recent sightings of the hare but then ask Clarke to help them search for their missing chief as well. On further investigation Clarke finds more than meets the eye:in the Mapuche and Voroga languages every word has at least two meanings.Witty, very ironic, and with all the usual Airian digressive magic, The Hare offers subtle reflections on love, Victorian-era colonialism, and the many ambiguities of language.

The "New York Times" bestselling first and second volumes in Anne Rice's Vampire Chronicles now join Ballantine's monthly "Special Low Price" mass market reissue program.

A fascinating exploration of how insights from computer algorithms can be applied to our everyday lives, helping to solve common decision-making problems and illuminate the workings of the human mind All our lives are constrained by limited space and time, limits that give rise to a particular set of problems. What should we do, or leave undone, in a day or a lifetime? How much messiness should we accept? What balance of new activities and familiar favorites is the most fulfilling? These may seem like uniquely human quandaries, but they are not: computers, too, face the same constraints, so computer scientists have been grappling with their version of such issues for decades. And the solutions they've found have much to teach us. In a dazzlingly interdisciplinary work, acclaimed author Brian Christian and cognitive scientist Tom Griffiths show how the algorithms used by computers can also untangle very human questions. They explain how to have better hunches and when to leave things to chance, how to deal with overwhelming choices and how best to connect with others. From finding a spouse to finding a parking spot, from organizing one's inbox to understanding the workings of memory, Algorithms to Live By transforms the wisdom of computer science into strategies for human living.

Outsider musicians can be the product of damaged DNA, alien abduction, drug fry, demonic possession, or simply sheer obliviousness. This book profiles dozens of outsider musicians, both prominent and obscure—figures such as The Shaggs, Syd Barrett, Tiny Tim, Jandek, Captain Beefheart, Daniel Johnston, Harry Parich, and The Legendary Stardust Cowboy—and presents their strange life stories along with photographs, interviews, cartoons, and discographies. About the only things these self-taught artists have in common are an utter lack of conventional tunefulness and an overabundance of earnestness and passion. But, believe it or not, they're worth listening to, often outmatching all contenders for inventiveness and originality. A CD featuring songs by artists profiled in the book is also available.

Some people are born with it. Meet the new Hollywood Royalty: Amelie, the no-so-innocent starlet; Myla and Ash, the golden couple; Jacob, the geek turned hottie; and Jojo, the outsider who'll do anything to get on the A-List.

The idea that one can soak up someone else's depression or anxiety or sense the tension in a room is familiar. Indeed, phrases that capture this notion abound in the popular vernacular: "negative energy," "dumping," "you could cut the tension with a knife." The Transmission of Affect deals with the belief that the emotions and energies of one person or group can be absorbed by or can enter directly into another. The ability to borrow or share states of mind, once historically and culturally assumed, is now pathologized, as Teresa Brennan shows in relation to affective transfer in psychiatric clinics and the prevalence of psychogenic illness in contemporary life. To neglect the mechanism by which affect is transmitted, the author claims, has serious consequences for science and medical research. Brennan's theory of affect is based on constant communication between individuals and their physical and social environments. Her important book details the relationships among affect, energy, and "new maladies of the soul," including attention deficit disorder, chronic fatigue syndrome, codependency, and fibromyalgia.

Susan Silverman's ex doesn't call himself "Silverman" anymore—he's changed his name to "Sterling." And that's not the only thing that's phony about him. A do-gooding charity fundraiser, he's been accused of sexual harassment by no less than four different women. And not long after Spenser starts investigating, Sterling is wanted for a bigger charge: murder...
