From the author of New York Times bestseller You’re Wearing That? this bestselling classic work draws upon groundbreaking research by an acclaimed sociolinguist to show that women and men live in different worlds, made of different words. Women and men live in different worlds...made of different words. Spending nearly four years on the New York Times bestseller list, including eight months at number one, You Just Don't Understand is a true cultural and intellectual phenomenon. This is the book that brought gender differences in ways of speaking to the forefront of public awareness. With a rare combination of scientific insight and delightful, humorous writing, Tannen shows why women and men can walk away from the same conversation with completely different impressions of what was said. Studded with lively and entertaining examples of real conversations, this book gives you the tools to understand what went wrong -- and to find a common language in which to strengthen relationships at work and at home. A classic in the field of interpersonal relations, this book will change forever the way you approach conversations.

This revised edition of Deborah Tannen's first discourse analysis book, Conversational Style--first published in 1984--presents an approach to analyzing conversation that later became the hallmark and foundation of her extensive body of work in discourse analysis, including the monograph Talking Voices, as well as her well-known popular books You Just Don't Understand, That's Not What I Meant!, and Talking from 9 to 5, among others. Carefully examining the discourse of six speakers over the course of a two-and-a-half hour Thanksgiving dinner conversation, Tannen analyzes the features that make up the speakers' conversational styles, and in particular how aspects of what she calls a 'high-involvement style' have a positive effect when used with others who share the style, but a negative effect with those whose styles differ. This revised edition includes a new preface and an afterword in which Tannen discusses the book's place in the evolution of her work. Conversational Style is written in an accessible and non-technical style that should appeal to scholars and students of discourse analysis (in fields like linguistics, anthropology, communication, sociology, and psychology) as well as general readers fascinated by Tannen's popular work. This book is an ideal text for use in introductory classes in linguistics and discourse analysis.

Offering a close-up look at mother-daughter relationships, a journalist draws on her own experience, as well as the wisdom of others, to provide advice and strategies on how to overcome the guilt, resentment, and anger that can destroy a family.

A professor of linguistics at Georgetown University decodes the conversational styles of female friends and explains how language contributes to this unique, cherished, and crucial connection.

A #1 New York Times bestselling author traces her father's life from turn-of-the-century Warsaw to New York City in an intimate memoir about family, memory, and the stories we tell. "An accomplished, clear-eyed, and affecting memoir about a man who is at once ordinary and extraordinary."--Forward Long before she was the acclaimed author of a groundbreaking book about women and men, praised by Oliver Sacks for having "a novelist's ear for the way people speak," Deborah Tannen was a girl who adored her father. Though he was often absent during her childhood, she was profoundly influenced by his gift for writing and storytelling. As she grew up and he grew older, she spent countless hours recording conversations with her father for the account of his life she had promised him she'd write. But when he hands Tannen journals he kept in his youth, and she discovers letters he saved from a woman he might have married instead of her mother, she is forced to rethink her assumptions about her father's life and her parents' marriage. In this memoir, Tannen embarks on the poignant, yet perilous, quest to piece together the puzzle of her father's life. Beginning with his astonishingly vivid memories of the Hasidic community in Warsaw, where he was born in 1908, she traces his journey: from arriving in New York City in 1920 to quitting high school at fourteen to support his mother and sister, through a vast array of jobs, including prison guard and gun-toting alcohol tax inspector, to eventually establishing the largest workers' compensation law practice in New York and running for Congress. As Tannen comes to better understand her father's--and her own--relationship to Judaism, she uncovers aspects of his life she would never have imagined. Finding My Father is a memoir of Eli Tannen's life and the ways in which it reflects the near century that he lived. Even more than that, it's an unflinching account of a daughter's struggle to see her father clearly, to know him more deeply, and to find a more truthful story about her family and herself.

America's foremost baby and childcare experts, William Sears M.D. and Martha Sears, R.N., explain the benefits -- for both you and your child -- of connecting with your baby early. Would you and your baby both sleep better if you shared a bed? How old is too old for breastfeeding? What is a father's role in nurturing a newborn? How does early attachment foster a child's eventual independence? Dr. Bill and Martha Sears -- the doctor-and-nurse, husband-and-wife team who coined the term "attachment parenting" -- answer these and many more questions in this practical, inspiring guide. Attachment parenting is a style of parenting that encourages a strong early attachment, and advocates parental responsiveness to babies' dependency needs. The Attachment Parenting Book clearly explains the six "Baby B's" that form the basis of this popular parenting style: Bonding, Breastfeeding, Babywearing, Bedding close to baby, Belief in the language value of baby's cry, and Beware of baby trainers. Here's all the information you need to achieve your most important goals as a new parent: to know your child, to help your child feel right, and to enjoy parenting.
