A perspective on the public sector that presents a concise and comprehensive analysis of exactly what it is and how it operates. Governments in any society deliver a large number of services and goods to their populations. To get the job done, they need public management in order to steer resources - employees, money and laws - into policy outputs and outcomes. In well-ordered societies the teams who work for the state work under a rule-of-law framework, known as public administration. This book covers the key issues of: the principal-agent framework and the public sector public principals and their agents the economic reasons of government public organization, incentives and rationality in government the essence of public administration: legality and the rule of law public policy criteria: the Cambridge and Chicago positions public teams and private teams public firms public insurance public management policy Public Administration & Public Management is essential reading for those with professional and research interests in public administration and public management.

Few stories are more captivating than the one told by Natalie Zemon Davis in The Return of Martin Guerre. Basing her research on records of a bizarre court case that occurred in 16th-century France, she uses the tale of a missing soldier - whose disappearance threatens the livelihood of his peasant wife - to explore complex social issues. Davis takes rich material - dramatic enough to have been the basis of two major films - and uses it to explore issues of identity, women's role in peasant society, the interior lives of the poor, and the structure of village society, all of them topics that had previously proved difficult for historians to grapple with. Davis displays fine qualities of reasoning throughout - not only in

constructing her own narrative, but also in persuading her readers of her point of view. Her work is also a fine example of good interpretation - practically every document in the case needs to be assessed for issues of meaning.

In most countries, parliament has the constitutional mandate to both oversee and hold government to account. In light of the increased focus on good governance, academics and legislative strengthening practitioners are re-examining parliament's oversight function with a view to increasing public financial accountability, curbing corruption, and contributing to poverty reduction. This volume brings together research from many different perspectives and many different legislative settings worldwide. As the country case studies in section III demonstrate, the accountability mechanisms or oversight tools available to the legislature vary based on constitutionally defined powers of the legislature, institutional arrangements between the branches of government, divisions of authority between national, regional, and local governments, the degree of legitimacy conferred on the legislature, and the resources available to it. The budget process provides critical opportunities. Section II of this volume is devoted to examining budget oversight from the formulation and approval of the budget, to implementation and the ex post examination of the public accounts. Special attention is also paid to mechanisms to assist parliaments such as Public Accounts Committees and independent parliamentary budget offices. This title will be of interest to parliamentarians and parliamentary staff, legislative strengthening practitioners, and students of legislative development.
